

Benign Prostatic Hyperplasia Therapeutics Market Size Estimated to Surpass USD 9.39 billion by 2030 | CAGR of 5.0%

North America held the largest market share in 2022, accounting for more than two-fifths of the market, and is expected to maintain its dominance by 2030.

PORTLAND, OREGON, UNITED STATES, April 21, 2023 /EINPresswire.com/ -- Allied Market Research has published a study report with the title [Benign Prostatic Hyperplasia Therapeutics Market](#) Size was Valued at USD 4.55 Billion in 2022, and is Projected to Garner USD 9.39 Billion by 2030, registering a CAGR of 5.0% from 2021 to 2030.

This report provides a comprehensive overview of the Benign Prostatic Hyperplasia Therapeutics Market, including an in-depth analysis of market trends, key segments, investment opportunities, value chain analysis, regional landscape, and competitive scenarios. It offers valuable insights for established market players, new entrants, investors, and other stakeholders to devise effective strategies and make informed decisions to enhance their market position. The report is a valuable resource for anyone seeking to gain a deeper understanding of the Benign Prostatic Hyperplasia Therapeutics Market and its growth potential in the future.

Benign Prostatic Hyperplasia (BPH) is a non-cancerous enlargement of the prostate gland, which can lead to urinary problems. The market for BPH therapeutics is growing due to the increasing prevalence of the condition and the development of new treatments. The report provides a detailed analysis of the market, including the current market size, growth rate, and key players. It also identifies the opportunities and challenges in the market and provides recommendations for stakeholders.

Market Overview:

Benign prostatic hyperplasia (BPH) is a medical condition in which a male's prostate gland size increases abnormally. This condition results in problems to start urination, weak urine stream, inability to empty the urinary bladder, and enhanced urine frequency usually at night. BPH therapeutics are drugs categorized into three different classes namely, alpha blocker, 5-alpha reductase inhibitors, and phosphodiesterase-5 inhibitor. These drugs relax the smooth bladder muscles or shrink the abnormal prostate growth to alleviate the BHP symptoms. The relaxation of the muscles of the bladder loosens the prostate's grip on the urethra facilitating urine to flow more freely. Whereas, the shrinkage of the size of the prostate reduces the pressure exerted by the prostate on the urethra, resulting in free flow of urine.

- Mono drug therapy
- Combination drug therapy

Based on region, North America held the largest market share in 2020, accounting for more than two-fifths of the global benign prostatic hyperplasia therapeutics market, and is expected to

maintain its dominance by 2030. This is due to increase in benign prostatic hyperplasia cases, robust R&D infrastructure for life science research, surge in adoption of advanced technologies, improved therapeutics, and presence of key players. However, Asia-Pacific is estimated to witness the fastest CAGR of 6.8% from 2021 to 2030, owing to continuous government support for R&D activities for pharmaceutical and biotechnology, increase in public-private investments, and rise in the number of initiatives for urological disorder awareness.

KEY BENEFITS FOR STAKEHOLDERS:

- This report provides a quantitative analysis of the current trends, estimations, dynamics, and clinical developments, which assist in identifying the prevailing opportunities and market behavior.
- Major countries in each region are mapped according to individual market revenue.
- This study evaluates the competitive landscape and value chain to understand the competitive environment across the geographies.
- Comprehensive analysis of factors that drive and restrict the growth of the Benign Prostatic Hyperplasia Therapeutics Market is provided.
- Leading players and their key developments in recent years are listed.

Our Market Research Solution Provides You Answer to Below Mentioned Question:

- Which are the driving factors responsible for the growth of market?
- Which are the roadblock factors of this market?
- What are the new opportunities, by which market will grow in coming years?
- What are the trends of this market?
- Which are main factors responsible for new product launch?
- How big is the global & regional market in terms of revenue, sales and production?
- How far will the market grow in forecast period in terms of revenue, sales and production?
- Which region is dominating the global market and what are the market shares of each region in the overall market in 2022?
- How will each segment grow over the forecast period and how much revenue will these segments account for in 2030?
- Which region has more opportunities?

By Region Outlook

- North America
(U.S., Canada, Mexico)
- Europe
(Germany, France, UK, Italy, Spain, Rest of Europe)
- Asia-Pacific

(Japan, China, India, Rest of Asia-Pacific)

- LAMEA

(Brazil, Saudi Arabia, South Africa, Rest of LAMEA)
