The key highlights of the report include:

Market Overview (2018-2028)

Historical Market Size (2020): USD 1.68 billion

Forecast CAGR (2023-2028): 4.5%

Forecast Market Size (2026): USD 2.1 billion

Urinary Drainage Bags is witnessing increase in growth due to increasing geriatric population, growing urinary infectious diseases, increase in several urological and gynecological surgeries,

increasing prevalence of urinary incontinence. The global demand for urinary drainage bags is driven by a surge in geriatric populations suffering from chronic diseases such as Alzheimer's disease, blindness, and end-stage renal diseases. In addition, leg bags are strongly favoured due to their advantages, such as ease of use and patient mobility allowance. Often, due to their compact nature, they can be conveniently placed along the legs.

Industry Definition and Major Segments

Urinary drainage bag is a medical instrument to collect urine. A catheter (tube) that is inside your bladder is connected to your bag. Owing to urinary incontinence (leakage), urinary retention (not being able to urinate), surgery that made a catheter required, or another health issue. They are either small leg bags or night bags of large sizes. These are commonly used in hospitals, clinics, and centers of surgery. There can be disposable or reusable urinary drainage bags. Due to the risk of infection associated with reusable urinary drainage bags, the demand for disposable bags is strong.

By usage, the market is divided into:

- Reusable
- Disposable

Based on product, the industry can be segmented into:

- Large Bags
- Leg Bags
- Others

The market is divided based on capacity into:

- 0-500 ml
- 500-1000 ml
- 1000-2000 ml
- More than 2000 ml

Based on end use, the industry can be bifurcated into:

- Hospital
- Clinics
- Ambulatory Surgical Centers
- Home Care

Others

The regional markets for the product include North America, Europe, the Asia Pacific, Latin America, and the Middle East and Africa.

Market Trends

With increasing mortality rate in the world due to increasing medical infrastructure, there is an increase in number of people in old age. Severe incontinence rapidly increases at the age between 70 and 80 years, thus increasing the demand of urinary drainage bags in world. The high demand for plastic urine drainage bags and the spike in choice over reusable urinary drainage bags is that they eliminate the risk of urinary tract infections. Furthermore, technical advances in the field of urological catheters offer major business opportunities.

Geographically, due to the presence of a large patient population, high healthcare spending, and the presence of major players in the region, the Americas is projected to dominate the global urinary drainage bag market. Due to the rising geriatric population, the presence of a large patient pool and the rapid improvement of healthcare reforms, Asia-Pacific is the fastest growing market for urinary drainage bags.

Key Market Players

The major players in the market are Amsino International, Inc., Becton, Dickinson and Company, Cardinal Health, Inc., Flexicare (Group) Limited, Manfred Sauer GmbH among Others. The report covers the market shares, capacities, expansions, investments and mergers and acquisitions, among other latest developments of these market players.
