The Cannabis sativa plant, which is more famous for generating marijuana or hashish, is used to make hemp fibre. However, hemp only has 1% THC, compared to marijuana's 20% THC level, which is what gives users a high when they smoke it. This fibre possesses some amazing qualities, like excellent dyeability, mildew resistance, UV light blocking, and natural antibacterial capabilities. It also transfers heat efficiently. Paper, biodegradable plastic, building, healthy food, chemical cleanups, and fuel are just a few of the businesses that employ it. To improve safety regulations, automakers like BMW employ hemp fibre to reinforce their door panels. Therefore, owing to the growing environmental awareness

According to studies on consumer behaviour, between 2000 and 2014, the average customer purchased 60% more clothing, yet they only maintained each item for half as long. The sobering facts showing the amount pollution and harm to our rivers, oceans, and atmosphere the fashion industry is responsible for have been in the spotlight. An estimated truckload of used clothing is burned or dumped every second. Many residents are worried, yet the cost and time commitment of the present sustainable fashion solutions are substantial.

Online retail platform is the major driver of the Hemp Clothing Industry. Presently, most of the apparel manufacturing companies have their own web-based retail stores where users can gain excessive information about the organization such as latest news of product and company and financial-related information. The number of consumers shopping online is increasing, owing to availability of varied product options and price comparison on online shopping sites. This is

useful for retailers due to zero expenditure on physical outlets. The major reasons why consumers prefer online shopping online are consumers can read reviews provided by other consumers, compare various store & products, and consumers can compare product price by different sellers. According to "Our World in Data," about 1,140 million internet users are present in East Asia-Pacific region, followed by Europe and Central Asia, accounting for of over 650 million internet users. In addition, access to internet and online apparel retail portal has provided consumers a platform where they can easily compare assorted products and prices as well as shop with comfort. Moreover, increase in ease of shopping of apparel from online retail portal is attracting a large consumer base using internet, which is anticipated to fuel the overall Hemp Clothing Market Growth.
