

Food Cold Chain Market Growth to reach USD 526.00 Million at CAGR 11.4% in 2027- Emergen Research

Increased loss of food, growing demand for perishable food items, increase in the growth of cold chain infrastructure are driving the demand for the market.

VANCOUVER, BRITISH COLUMBIA,
CANADA, April 24, 2023

/EINPresswire.com/ -- The Global [Food Cold Chain Market](#) is projected to reach USD 526.00 billion in 2027.

Technological innovation is expected to drive growth in packaging, processing and storage of seafood products.

The cooling system is used for the prolongation of shelf life and to improve product consistency as part of cold chain solutions. Coolants used in cooling systems pose an environmental hazard because of their high global warming potential (GWP) and ozone depletion capability (ODP). The industry is expected to benefit from more strict food safety legislation such as the Modernization Act on Food Security, which calls for greater consideration of the construction of a cool storage facility. The temperature-controlled warehouses are extremely energy sensitive because they have a high energy consumption cooling and ventilation system.

The temperature-controlled warehouses are extremely energy sensitive because they have a high energy consumption cooling and ventilation system. Nonetheless, improved design will reduce energy consumption and help create net zero energy storage facilities. Smart warehouse automation and control systems are a component in making buildings self-sustainable with net zero electricity.

The food cold chain market is a changing business that is affected by many different things. One of the main things driving the market is the rising demand for food products that go bad quickly. With more people living in the world and their eating habits changing, more fruits, vegetables, meat, and dairy items are being eaten. Because of this, there is a growing need for food cold chain solutions to keep these goods' quality throughout the supply chain.

Need for better food safety and quality is another thing that drives the business. As people become more aware of food safety and quality issues, there is a growing demand for food cold chain solutions that can keep perishable foods fresh and keep their nutritional value. Because of this, new technologies like temperature tracking systems, automated inventory management, and cold storage solutions have been made.

Key findings from the report suggest

Connected goods allow companies to establish better consumer ties by differentiating products and going beyond market competition.

The market has gained popularity in developing countries due to a move from improved production to better transport and storage facilities.

The IoT technologies of key importance for the pharmaceutical industry include the control of the cold chain, intelligent packaging, product lifecycle administration, men and material and connected equipment.

The supply chain, allowed by RFID, provides improved productivity and has opened up new opportunities with visibility at product level.

Competitive Outlook:

This part of the study looks at how competitive the global food cold chain market is. It focuses on the major players, their strategic initiatives, their market positions and market shares, and their growth prospects for the future. In addition to showing how the company plans to grow, the study also shows how it plans to create new products, improve technology, and come up with new ideas for products. The study also looks at important business events in this industry, such as mergers and acquisitions, joint ventures, partnerships, corporate deals, and brand marketing.

Global Food Cold Chain Market Report – Segmental Analysis:

When categorizing the global Food Cold Chain business vertical, the end-user sectors, product categories, application spectrum, competitive landscape, and competitive analysis were all considered. The report examines the current market situation, its historical performance, demand-to-supply ratios, production-to-consumption rates, sales, and the market's numerous

growth opportunities. In addition, it forecasts the growth of the leading regional segments of the market, which helps readers acquire insightful knowledge of the Food Cold Chain business sector. A clear outline of the market's competitive landscape is expected to aid businesses in this sector in deciphering the optimal business moves to achieve their desired business objectives.

Market Segmentation by Product Type:

Type Outlook (Revenue: USD Billion; Volume: Million Tons; 2017-2027)

Storage

Transportation

Monitoring components

Packaging Outlook (Revenue: USD Billion; Volume: Million Tons; 2017-2027)

Product

Materials

Application Outlook (Revenue: USD Billion; Volume: Million Tons; 2017-2027)

Fruits & vegetables

Fruit pulp & concentrates

Dairy products

Fish, meat, and seafood

Processed food

Pharmaceuticals

Research Methodology

Emergen Research follows a cohesive methodology to reduce the residual errors to a minimum level by refining the scope, validating through primary insights, and nurturing the in-house database on a regular basis. A dynamic model is formulated to capture the regular fluctuations in the market and thereby, being updated with any shifts in the market dynamics.

report or its customization. Our team will ensure the report is best suited to your needs

Key Geographies Profiled in the Report:

North America (the U.S., Mexico, and Canada)

Asia Pacific (China, Japan, India, and Rest of Asia Pacific)

Europe (the U.K., France, Germany, and Rest of Europe)

Latin America(Brazil and Rest of Latin America)

Middle East & Africa(GCC Countries and Rest of Middle East & Africa)

The principal players in the business are:

Americold Logistics LLC

Burris Logistics, Inc.

Agro Merchant Group

Cloverleaf Cold Storage

Lineage Logistics, LLC

Henningsen Cold Storage Company

Nordic Logistics, Swire Group

Preferred Freezer, and

Wabash National

Chapter 1. Market Synopsis

1.1. Market Definition

1.2. Research Scope & Premise

1.3. Methodology

1.4. Market Estimation Technique

Chapter 2. Executive Summary

2.1. Summary Snapshot, 2019-2027

Chapter 3. Indicative Metrics

Chapter 4. Food Cold Chain Market Segmentation & Impact Analysis

4.1. Food Cold Chain Market Material Segmentation Analysis

4.2. Industrial Outlook

4.2.1. Market indicators analysis

4.2.2. Market driver's analysis

Key Questions for Food Cold Chain

What are the current trends and challenges facing the food cold chain market?

What is the impact of changing dietary habits and globalization on the demand for food cold chain solutions?

What are the primary drivers of growth in the food cold chain market, and how are they expected to evolve in the future?

How are advances in technology, such as temperature monitoring systems and cold storage solutions, impacting the food cold chain market?

What role does sustainability play in the food cold chain market, and how can companies improve their sustainability efforts?

How are regulations and compliance requirements impacting the food cold chain market, and how can companies ensure compliance?

Know who we are:

Emergen Research is a market research and consulting company that provides syndicated research reports, customized research reports, and consulting services. Our solutions purely focus on your purpose to locate, target, and analyse consumer behaviour shifts across demographics, across industries, and help clients make smarter business decisions. We offer market intelligence studies ensuring relevant and fact-based research across multiple industries, including Healthcare, Touch Points, Chemicals, Types, and Energy. We consistently update our research offerings to ensure our clients are aware of the latest trends existent in the market. Emergen Research has a strong base of experienced analysts from varied areas of expertise. Our industry experience and ability to develop a concrete solution to any research problems provides

our clients with the ability to secure an edge over their respective competitors.
