The revised Payment Services Directive (PSD2) is a European regulation that requires banks to create mechanisms. With this mechanism, third-party providers

are able to work securely, reliably, and rapidly with the bank's services. Thus, strong customer authentication (SCA) is a requirement for payment service providers within the European Economic Area. The requirement ensures that electronic payments are performed with multi-factor authentication. It impacts the maintaining, security of electronic payments.

The PSD2 and Open Banking Market research compliments and examines the disrupting forces

and their role, and structure in a competitive environment for financial institutions and the markets.
