10ZiG Technology Celebrates 20th Anniversary Milestone for Thin Clients in 2023

Two Decades of Dedication, Specialization, and Innovation has Led up to 10ZiG Technology's 20th Milestone Anniversary This Past January of 2023.

PHOENIX, ARIZONA, UNITED STATES, April 27, 2023 /EINPresswire.com/ -- A lot has changed at 10ZiG over the past 20 years, but there is one thing that certainly has not – 10ZiG's dedication as a Thin Client Hardware & Software specialist in the Virtual Desktop industry. Having just come out of a successful Q1 in 2023, 10ZiG is celebrating its status as one of the few

Two Decades of Dedication, Specialization, and Innovation has Led up to 10ZiG Technology's 20th Milestone Anniversary This Past January of 2023.

ongoing leading hardware endpoint providers for VDI, Cloud, and DaaS including NOS™, a 10ZiG stripped-down Thin Client platform, custom-designed for support for VMware, Citrix, and Microsoft. While a few others can't hold onto the hardware side of VDI – in turn, 10ZiG is further specializing its endpoint line by streamlining models and adding in both mobile and enhanced All-in-One options. Now, that's something to celebrate!

Instead of working its way out of the market, 10ZiG is working with the market, and its partners and customers, by continually enhancing and offering a solidly crafted, marketing-leading supported hardware line with innovative management and repurposing software. 10ZiG Manager™, the 10ZiG centralized management enterprise software console, has been and continues to be FREE, without license limitations, and is constantly being updated to anticipate and meet market demands. More of a best-kept secret until recently, another market-responsive platform is 10ZiG's RepurpOS™ Software which transforms nearly any device to run a purpose-built, Linux-based operating system, providing cost-savings and sustainability of existing hardware.

CTO Kevin Greenway, "The power behind this celebratory 20 years of success is really not just the business model, it's the people. Our position is to support customers and partners who need hardware while adapting to current needs, and adapting our software to do the same, whether it

is managing devices or repurposing devices. We've got something for everyone – a one-stop virtual shop under one hood and its working. What puts us over the edge even further is continual praise of our people. Dedication to fantastic communication and customer service is always key. Layer that with innovation and solely focused Thin Client specialization, it's truly a win for everyone!"
