Director at Maple Lawn  
Nursing Home*

FacilityONE’s SMARTPRINTS are interactive floor plans populated with a facility’s equipment for preventative maintenance and work order management. Annotation layers, an available enrichment to SMARTPRINTS, are digital layers created to display specific assets, routes, and zones.

At Maple Lawn Nursing Home, these FacilityONE solutions are used to display life safety resources including

emergency exits, fire extinguishers, and exit signs. In case of an emergency, SMARTPRINTS and its annotation layers provide a faster, more informed response by the facility management team, resulting in improved life safety efforts for the community.

“FacilityONE has been great to work with; the software is very easy to navigate, and client services is very prompt in getting back to me whenever I have questions,” Ron Kraft, Support Service Director at Maple Lawn Nursing Home, said. “If we need assistance, they always do their best to come up with a solution that works for our facility’s staff and residents.”
