Definition:

Biometrics refers to the use of unique physical or behavioral characteristics of an individual to authenticate their identity. The banking and financial services industry has increasingly been adopting biometric technologies as a means to enhance security and convenience for customers. Overall, biometric technologies offer a high level of security and convenience for customers in the banking and financial services industry. As technology continues to advance, we can expect to see more biometric solutions being developed and adopted by banks and financial institutions.

Revenue and Sales Estimation — Historical Revenue and sales volume are presented and further data is triangulated with top-down and bottom-up approaches to forecast complete market size and to estimate forecast numbers for key regions covered in the report along with classified and well-recognized Types and end-use industry.
