

# District 4 Labs officially launches Darkside, one of the world's largest Repositories of Compromised Records

*Darkside, District 4's flagship product, is one of the world's largest repositories of compromised records and person of interest data.*

CHICAGO, IL, UNITED STATES, April 26, 2023 /EINPresswire.com/ -- District 4 Labs, a cutting edge deep and dark web data business, today announces the official launch of its flagship product, Darkside, a highly queryable repository of tens of billions of compromised records and other person-of-interest data.

Built by and for investigators, Darkside will supercharge any team's investigation & threat intelligence capability. Comprised of an ever-growing number of records culled from the far reaches of the deep and dark web over the last 15+ years, Darkside's data covers companies and individuals in every geography, sector, and demographic.

Darkside is used by cutting-edge corporate security teams, intelligence analysts, and cyber consultants to mitigate risk, prevent fraud, and uncover critical person and company-centric intelligence.

Use cases for Darkside include:

- Conducting cyber and traditional investigations
- Enhancing due diligence reports
- Enabling threat attribution
- Identifying corporate or customer credentials
- Supporting breach litigation
- Conducting dark web exposure assessments for companies and individuals
- Managing third party risk

The data is currently available via an easy to integrate REST API and through our custom integration with Maltego, a leading link analysis platform, with additional integrations forthcoming. More information on our integration with Maltego can be found on their [Transform Hub](#).

If you're interested in learning more about District 4 Labs or demoing Darkside, please reach out to us via [our website](#) or [info@district4labs.com](mailto:info@district4labs.com).

## About District 4 Labs

District 4 Labs is a cutting-edge data business dedicated to building the open-source intelligence (OSINT) tools and technologies of tomorrow. The company was founded through investments by security and investigations professionals, including its lead strategic partner, Prescient, a global risk management and intelligence services firm based in Chicago. Prescient's cyber team has relied on District 4's data for several years to power its investigations, assessments, and monitoring efforts.
