Definition:

The CCTV camera stands for a closed-circuit television camera, is sometimes simply called video

surveillance. CCTV refers to a system of video feeds, which are transmitted within a closed system from various security cameras. CCTV is different from broadcast television, in that signals are not sent out for just anyone to intercept. Rather, video streams are available only to authorized users. In practical terms, any home security camera surveillance system is technically a CCTV system. Nowadays, CCTV cameras now feature high-resolution full-color feeds, and many are capable of switching seamlessly to infrared at night. Moreover, Night vision is a technological advance that allows a user to penetrate even the deepest dark to see images.
