Definition:

Retail banking refers to the banking services provided to individual customers or small businesses, rather than to large corporations or institutions. It includes a range of financial products and services, such as savings and checking accounts, personal loans, credit cards, mortgages, and investment products. Retail banks operate through physical branches, online banking platforms, mobile applications, and other channels to provide their customers with convenient access to their financial services. The goal of retail banking is to serve the needs of individual customers and small businesses, while generating revenue for the bank through interest and fees on the financial products and services provided.

Market Drivers:

development of new technologies has led to the growth of digital banking, allowing customers to access their financial services through mobile applications, online platforms, and other digital channels. This has increased the convenience and accessibility of banking services, driving the growth of the retail banking market.
