Rise in disposable income and increase in expenditure on entertainment boost the growth of the global online entertainment market. Furthermore, technological advancements in smart devices such as increase in size of smartphones, introduction of smart TVs attract a large base of customers, thereby propelling the growth of the product market, globally. Wide touchscreen, HD displays, and strong internet connectivity have enhanced the visual experience, which has notably contributed toward the growth of the global market.

Increase in alternative means of entertainment for traditional TVs and their growing popularity

are expected to offer remunerative opportunities for the growth of the product market. Furthermore, multi-device delivery and surge in demand for digital advertisements are providing supportive ground for the growth of the global market. However, rise in cyber threats, cloud unpreparedness, and poor connectivity in rural areas hinder the growth of the product market.

According to current online entertainment market trends, the online entertainment market segments described into form, revenue model, device, and region.

By form, it is categorized into video, audio, games, internet radio, others.

Depending on revenue model, it is fragmented into subscription, advertisement, sponsorship, and others.

On the basis of device, it is differentiated into smartphones, smart TVs, projectors & monitors, laptop, desktops & tablets, and others.

Region wise, it is analyzed across North America (the U.S., Canada, and Mexico), Europe (Germany, the UK, France, Russia, Italy, Spain, and rest of Europe), Asia-Pacific (China, India, Japan, Australia, South Korea, and rest of Asia-Pacific), and LAMEA (Latin America, the Middle East, and Africa).

On the basis of revenue model, the subscription segment was valued at \$46.5 billion in 2019, and is expected to reach \$226.1 billion by 2027, registering a CAGR of 25.5% from 2021 to 2027. In recent years, subscription-based revenue model has been majorly used for the online business.

On the basis of devices, the smartphone segment is estimated to reach \$294.3 billion by 2027, at a CAGR of 21.0%. In recent years, smartphones have witnessed increase in adoption, owing to their portability and increase in utility. Large screen smartphones can be used to enhance the experience of seeing videos, streaming music, surfing internet, and playing HD video games.

Region wise, North America dominated the online entertainment market in 2019, and is projected to sustain its dominance during the forecast period. This majorly attributed to quick adoptions for technological changes, availability of high band width connection, and high digital literacy rate. Moreover, over-the-top media services have gained notable popularity in the North America region, owing to the benefits associated with them such as they offer original & unique content, they are convenient to use, , and they are compatible with smartphones. Technological advancements in the smart devices such as incorporation of smart displays and smart speakers further augment the growth of the product market in the region. U.S. dominates the online entertainment market in North America, owing to the advancements in different aspects such as

graphics and experience. Moreover, the advent of cross-platform gaming has turned out to be highly beneficial for online gaming market players. Thus, increase in popularity of the OTT media services and online gaming is expected to boost the online entertainment market demand in the U.S.

The players operating in the online entertainment market have adopted product launch and business expansion as their key developmental strategies to expand their market share, increase profitability, and remain competitive in the market. The key players profiled in online entertainment market report include Amazon Web Services (AWS), Netflix, Inc., Google LLC, Facebook, Tencent Holdings Ltd, Sony Corp, King Digital Entertainment Ltd, Spotify Technology S.A., Rakuten, Inc., and CBS Corporation.
