

South Carolina Company FireGator™ Automatic Fire Suppression Creates a Safer Ride for Students and a Cleaner Environment

GREENWOOD, SOUTH CAROLINA, UNITED STATES, May 1, 2023 /EINPresswire.com/ -- [FireGator™](#) proudly operates under the banner of the “Safe, Effective, and EPA approved Automatic Fire Suppression.” School bus fires are prevalent in the United States. In fact, according to an article in [Bus Fleet Magazine](#), “in the U.S. between one and two school bus fires occur every day. The reasons for the fires seem endless: turbocharger, engine, and mechanical failures occur; wires loosen or rub against engine parts; old parts lose their integrity; tires explode; circuit boards become overloaded; and leaks release inflammatory fluids.”

Regardless of the reason, the innovative professionals at FireGator™ cover all the bases in protecting the precious passengers, drivers, and company property with their state-of-the-art fire suppression system. Fires travel fast and every second counts. FireGator’s automatic fire suppression systems detect fires and activate immediately when an engine fire occurs. This allows the driver the much-needed time to focus on getting students safely off the bus. As an industry leader, FireGator™ products service the whole gamut from buses, motor coaches, farm equipment, construction equipment, and heavy machinery.

The South Carolina based company is setting the pace as a provider of superior fire suppression systems. Their time-tested product protects the engine compartments and battery storage areas. In addition, they can provide protection for in-cabin fires.

FireGator™ has a firm commitment to customer satisfaction and offers the lowest ownership cost in the industry with a 15-year lifespan and hopes this is extended to 20 years. Their focus is to deliver the most reliable and cost-effective fire suppression system available. Their suppression agent is clearly the go-to in EV protection and safe for children and the environment. It is also a world leader for Lithium-ion battery protection.

The graphic features a red and orange color scheme. At the top left is the FireGator logo with the text "FIREGATOR™ AUTOMATIC FIRE SUPPRESSION SYSTEM". Below it is a dark grey banner with the text "THE FUTURE OF FIRE SUPPRESSION". To the right is a circular image of a school bus with a fire, with the word "safe" in a dark circle. Below that is another circular image of an engine compartment with a fire, with the word "effective" in a dark circle. At the bottom right is a "CONTACT US" section with the phone number "864.233.5443" and address "1626 Rivers Street Greenwood, SC 29649". At the bottom left is the website "www.fire-gator.com" and email "sales@fire-gator.com".

ABOUT US
FireGator™ has utilized the latest technology to become the future of fire suppression. Our design can easily be factory installed and requires minimal maintenance over its 15 year lifespan.

BENEFITS

- Non-pressurized
- Easy cleanup
- Environmentally friendly
- Lightweight
- No nozzles
- Earliest Detection
- Lowest Operating Cost

Benefits of Fire Gator Fire Suppression Systems

Safe, Effective, and EPA approved Automatic Fire Suppression.”

FireGator™

FireGator™ offers remote or onsite inspections, web-based operations, and the simplest installation in the industry. One green LED, with a 110k hour life span, monitors the system, with all Deutsch fittings included. FireGator's benefits far outweigh the competition. Unlike pressurized units, they are non-pressurized and adaptable to new

technology. The cleanup is easy, and it is lightweight, no nozzles with earliest detection, and environmentally friendly. Best of all, cost conscious FireGator™ offers the lowest total ownership cost.

The NTSB recommends that all school buses shall have a fire suppression system.

Also, The School Bus Safety Act of May 20, 2021, had two major components. It requires a fire suppression system, which addresses engine fires; and a firewall that prohibits hazardous quantities of gas or flame to pass through the firewall from the engine compartment to the passenger compartment. The trusted team at FireGator™ stands ready to address this need by supplying a superior product to help control fires and save lives.
