# nOps Launches nKS - The Solution That Supercharges Karpenter and Optimizes Your AWS Spend in Real Time

Discover how nKS intelligently optimizes and automates EKS resource management, helping businesses effortlessly save time and money.

SAN FRANCISCO, CALIFORNIA, UNITED STATES, May 3, 2023 / EINPresswire.com/ -- nOps, the leading Cloud Cost Management Platform, is thrilled to announce the upcoming launch of nKS - the revolutionary Karpenter-based solution that integrates the power of Amazon's EKS node management framework with nOps' advanced ML-driven cost optimization engine.

nOps Launches nKS - The Solution That Supercharges Karpenter and Optimizes Your AWS Spend in Real Time.

nKS is designed to simplify the complexities and challenges associated with managing commitments and Spot workloads in a dynamic EKS environment. In addition, early Spot termination prediction allows teams to move mission-critical workloads to Spot with confidence. This allows teams to focus on core innovation by putting savings on autopilot instead of focusing on the ever-shifting complexity of the AWS pricing ecosystem.

> "We are thrilled to unveil nKS, that simplifies EKS management while optimizing AWS cost. nKS supercharges Karpenter and enables businesses to focus on driving innovation, putting savings on autopilot."
>
> *JT Giri, CEO at nOps*

nKS supercharges Karpenter, an open-source project that automates node management for Kubernetes. By integrating Karpenter with nOps' cost optimization engine, nKS provides a powerful and flexible solution for businesses that need to scale their EKS clusters.

"At nOps, we are committed to empowering businesses to

manage their cloud resources with efficiency and ease. nKS is a prime example of our dedication to innovation and providing the best possible solutions to our customers," says JT Giri, CEO of nOps.

Join the waitlist and get early access to nKS by registering here. Don't miss the chance to experience the game-changing Karpenter solution that will redefine how businesses manage their EKS resources and optimize their AWS spend.
