

# Sharon Fellner Publishes Groundbreaking Study on Preeclampsia and Peripartum Cardiomyopathy

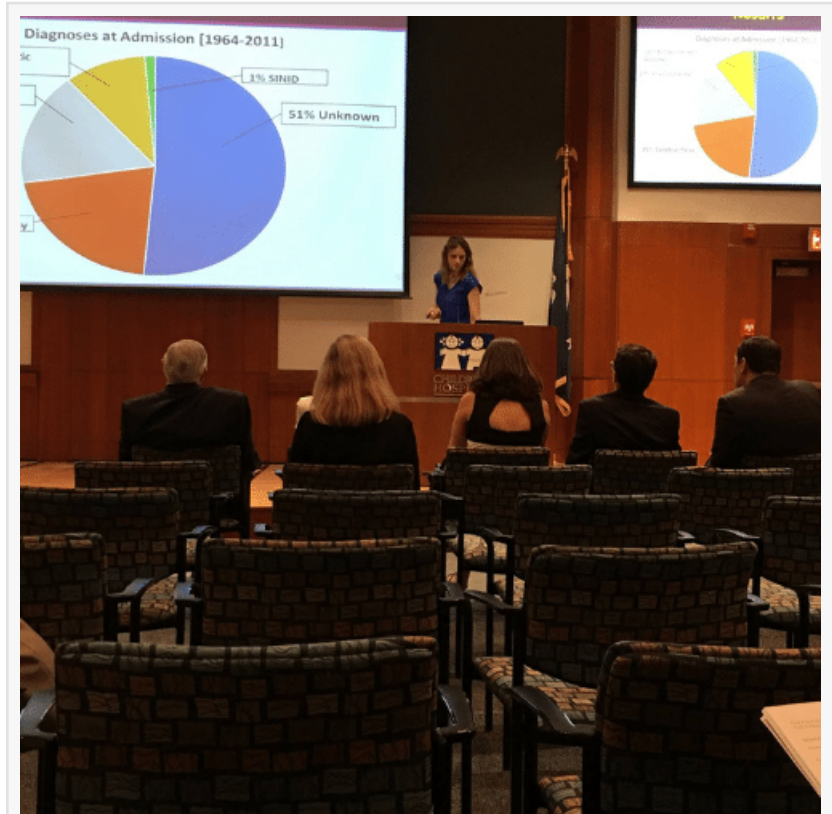

*Sharon Fellner, a renowned researcher, and author, has published a groundbreaking study on the connection between preeclampsia and peripartum cardiomyopathy.*

BATON ROUGE, LOUISIANA , UNITED STATES, May 3, 2023 / EINPresswire.com/ -- In collaboration with other medical professionals, [Sharon Fellner](#) has published a groundbreaking study on the link between preeclampsia and peripartum cardiomyopathy in a 24-year-old woman. The study, "Preeclampsia and Peripartum Cardiomyopathy in a 24-Year-Old Woman," was published on May 20, 2015, in the American Medical Student Research Journal.

The study is an essential contribution to the field of maternal-fetal medicine, shedding light on the complex interplay between preeclampsia and peripartum cardiomyopathy. Preeclampsia is a severe pregnancy complication that affects up to 5% of pregnant women, and it can lead to a range of health issues for both the mother and the baby. On the other hand, peripartum cardiomyopathy is a rare but severe form of heart failure that occurs in the last month of pregnancy or within five months after giving birth.

The study's findings suggest that preeclampsia may be a risk factor for developing peripartum cardiomyopathy and that early diagnosis and treatment may improve outcomes for women who develop this condition.

"We are excited to share our findings with the medical community and the public," [said Sharon](#)

[Fellner](#), co-author of the study. "We hope this study will contribute to a better understanding of these complex conditions and improve outcomes for women and their babies."

The study has already garnered attention from medical professionals and researchers. Sharon Fellner and her team look forward to continuing their research in this area.

For more information about the study and its findings, please refer to the American Medical Student Research Journal published article.

#### [About Sharon Fellner](#)

Sharon Fellner is a medical technologist with extensive experience and education in the medical field. She earned her Bachelor's degree in Biology from Louisiana State University, followed by a Master's degree in Human Genetics from Tulane University. She then went on to earn her Doctorate in Medicine from Louisiana State University Health Sciences Center. Sharon has worked in various positions in the medical industry, including as a clinical documentation improvement specialist at Byrd Regional Hospital and as an instructor at Delgado Community College. She is currently working as a medical technologist at Baton Rouge General Hospital, where she performs a range of tests in the laboratory. Sharon is known for her dedication to learning and improving her skills, making her a valuable asset to the medical community.
