

Balfour Capital Group Unveils Income and Growth Combined Product

High Net Worth Individuals , Introducing brokers , and Insurance agents

LUXEMBOURG, May 3, 2023

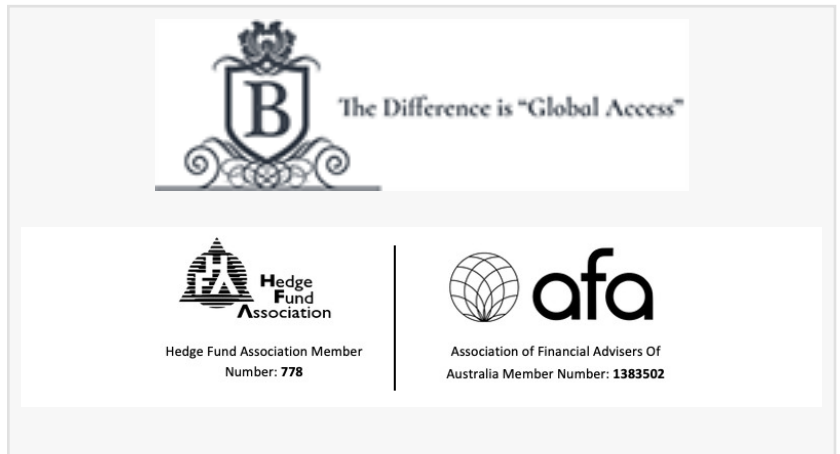

/EINPresswire.com/ -- Balfour Capital

Group is proud to announce the unveiling of our new [Income Strategy Program](#), spearheaded by Chief

Investment Officer Steve Alain Lawrence. With over 30 years of

experience in [investment strategies](#)

and electronic trading, Steve Alain Lawrence and his world-class team have created a unique product that addresses the growing needs of our clients in a rising interest rate environment.

The Balfour Capital Income Strategy Program is designed to provide investors with a diversified portfolio of income-generating assets while minimizing risk through the use of specific asset classes. Our proprietary investment strategy involves investing in A-rated corporate bonds, the US Treasury market, and foreign Treasuries and foreign corporate bonds. We also use an arbitrage strategy between the corporate bond market and the US Treasury market and invest in stock index futures. Additionally, we

“

Never depend on a single income. Make investment to create a second source.”

Warren Buffet

add synthetic contracts for futures deliverable CFDs to our portfolio.

Before investing in any asset class, it's important to define investment goals and risk tolerance. We allocate funds to each asset class based on our clients' investment objectives to provide a steady stream of income, capital preservation, or growth.

Our Chief Investment Officer and his team carefully select A-rated corporate bonds with a maturity of 5 to 10 years using a bond screener tool. We implement the arbitrage strategy by simultaneously buying a corporate bond and selling a US Treasury bond of equivalent maturity to earn a profit from the price difference between the two bonds. Investing in stock index futures through a futures brokerage account allows us to profit from the price movements of the stock index without owning the underlying stocks. Investing in the US Treasury market and foreign

Treasuries and foreign corporate bonds enables us to earn interest income while diversifying our portfolio. Finally, we add synthetic contracts for futures deliverable CFDs to our portfolio to profit from the price movements of commodities such as gold or oil without owning the physical commodity.

Investing with Balfour Capital Group's Income Strategy Program provides a diversified portfolio of income-generating assets with the potential for a steady stream of income while minimizing risk. With the expertise of our Chief Investment Officer and his team, who have managed over \$250 million, our clients can rest assured their investments are in capable hands.

For more information on our Income Strategy Program, please [visit our website](#) or contact us directly.
