

ENTEXS Corporation Ethanol & Terpene Extraction Technologies Added to Southern Crop Facility in Mississippi

ENTEXS' Fully Automated Extraction System for First Cannabis Cultivation and Processing Licensee of Mississippi

SACRAMENTO, CA, USA, May 9, 2023 /EINPresswire.com/ -- [ENTEXS Corporation](#), a California-based extraction technology and equipment manufacturer for the hemp and cannabis industries, installs their [MINI 3](#) Ethanol Extraction System and Terpene Extraction Module in [Southern Crop's](#) facility in Meridian, Mississippi.

ENTEXS develops and manufactures their complete processing solutions in the USA. The in-house capability allows them to R&D innovative technologies and components for the most advanced extraction capabilities at an industrial scale. The ENTEXS Terpene Extraction Module utilizes steam distillation pre-extraction for terpene profile preservation and collection. Their MINI 3 closed-loop extraction system can process up to 300 pounds per day and features a genuinely hands-free, automated process from biomass to finished full spectrum crude or distillate product with push-button control. Fully automated routines allow user customization and complete process control to meet the most stringent quality requirements.

"As a company that specializes in the cannabis industry, staying at the forefront of cutting-edge technology and product innovation is one of the pillars of our success at Southern Crop," says Jeff Spinder, Director of Extraction and Manufacturing. "ENTEXS' state-of-the-art technology allows us to effortlessly customize our extraction needs with a fully automated system. Thanks to our partnership with ENTEXS, we are able to produce higher quality products more efficiently, which will help us become leaders in the Mississippi Cannabis market."

Southern Crop was the recipient of the first Cannabis Cultivation and Processing License from

ENTEXS' Fully Automated Extraction System for First Cannabis Cultivation and Processing Licensee of Mississippi

the Mississippi Department of Health for their 175,000 sq ft Tier 6 cGMP vertically integrated first-class facility. The company is positioned for a multistate expansion stemming from its commitment to producing top-of-the-line cannabis products through innovation and high standards from seed to sale. The goal is to cultivate a long-term positive impact that catalyzes the availability of options and access to premium plant-based wellness CPG products. □

ENTEXS and Southern Crop Teams reviewing ENTEXS Terpene Extraction System upon installation

ENTEXS CEO Ali Rashid comments: "Southern Crop is paving the way for the thriving new medical cannabis industry in the Mississippi market and beyond. We're excited to be their equipment partner alongside their journey, setting their extraction facility up for success with state-of-the-art technology."

“

Thanks to our partnership with ENTEXS, we are able to produce higher quality products more efficiently.”

Jeff Spinder, Director of Extraction and Manufacturing

Southern Crop will begin processing via the ENTEXS systems to further manufacture high-quality cannabis products for the patients of the Mississippi Medical Marijuana Program.

About ENTEXS:

ENTEXS □ provides first-in-class technology with custom in-house manufacturing to evolve constantly and develop machinery for the hemp and cannabis markets' needs. Its patent-pending technology is a hands-free, continuous-feed, closed-loop system with no winterization necessary, which increases productivity, yields, and quality of each extraction at a high-capacity, industrial scale. In addition to complete systems, □ ENTEXS □ offers an extraction component catalog which includes post-processing technologies and supports system customers with services such as installation, site review, field verification, permitting, operation, and more. Compliant with global standards such as cGMP, EUGMP, and UI, all ENTEXS systems are customizable to the client's unique operational specifications.
