

# Ozone Generator Market Size Was USD 1578.45 Million At A CAGR Of 7.3% By 2032 | Reports And Data

*increasing demand for clean air and water, as well as the growing awareness of the harmful effects of pollution and pathogens on human health.*

NEW YORK CITY, U.S., UNITED STATES, May 4, 2023 /EINPresswire.com/ -- The market for [Ozone Generators](#) is experiencing significant revenue growth, driven by their demand in

various industries, including water treatment, air purification, healthcare, and food processing. The main reason behind this demand is the need for purifying air and water from harmful contaminants such as bacteria and viruses. Ozone generators are a viable solution to these problems, as they are capable of removing these contaminants from water and air, making them

safer for use. Moreover, ozone generators are environment-friendly, as they do not produce any harmful by-products.

“

Rising demand for ozone generators in the water treatment industry is driven by the need to provide safe drinking water.”

*Reports and Data.*

One of the major factors contributing to the demand for ozone generators is their application in water treatment. With the increasing need for safe drinking water, the use of ozone generators for disinfection, oxidation, and removal of organic contaminants is on the rise. Similarly, in the

food processing industry, ozone generators are being employed to remove microorganisms and improve the quality of food. In the healthcare sector, ozone generators are being used to eliminate airborne pathogens and improve the air quality of hospitals and other medical facilities. Furthermore, ozone generators are also used to sterilize medical equipment and supplies, adding to their overall demand.

Ozone Generator Market Segments:

Reports And Data

The global ozone generator market is segmented by type, application, and region. By type, the market is segmented into corona discharge, ultraviolet, electrolytic, and others. The corona discharge segment held the largest market share in 2019 and is expected to maintain its dominance during the forecast period. This is attributed to its ability to generate large amounts of ozone and its wide use in water treatment and air purification applications.

Based on application, the ozone generator market is segmented into air purification, water treatment, and others. The water treatment segment held the largest market share in 2019 and is expected to continue its dominance in the coming years. This is due to the increasing demand for safe drinking water and the use of ozone generators in water disinfection and removal of organic contaminants. Moreover, the air purification segment is expected to witness significant growth during the forecast period due to the increasing demand for indoor air quality control.

Geographically, the ozone generator market is segmented into North America, Europe, Asia-Pacific, Latin America, and the Middle East and Africa. Asia-Pacific dominated the market in 2019 and is expected to continue its dominance during the forecast period. This is due to the increasing industrialization and urbanization in the region, leading to a rise in air and water pollution. The presence of major manufacturers in the region also contributes to the growth of the market. North America and Europe are expected to witness significant growth during the forecast period due to the stringent regulations and increasing demand for clean air and water.

Ozone Generator Market Competitive landscape:

The global ozone generator market is dominated by a small number of key players who make up a significant portion of the market revenue. Among the major players in the market are companies such as Suez SA, Xylem Inc., De Nora, Toshiba Corporation, Qingdao Guolin Industry Co., Ltd., Ozomax Limited, Ecozone Technologies Ltd., Airthereal, Enerzen Commercial Ozone Generator, and Ozone Solutions Inc.

Suez SA is a multinational company that provides environmental services and solutions, including water and waste management. Xylem Inc. is a global water technology provider that specializes in solutions for water transportation, treatment, and analysis. De Nora is a leading supplier of electrodes, coatings, and complete electrochemical solutions for the electrochemical and water treatment industries. Toshiba Corporation is a multinational electronics and engineering company that operates in various industries, including energy, infrastructure, and electronic devices.

Other key players in the market include Qingdao Guolin Industry Co., Ltd., a manufacturer of ozone generators and related products, and Ozomax Limited, a company that specializes in the development and production of ozone generators and air purifiers. Ecozone Technologies Ltd. is

a UK-based company that develops and markets innovative environmental products, including ozone generators. Airthereal is a manufacturer of air purifiers and ozone generators, while Enerzen Commercial Ozone Generator and Ozone Solutions Inc. specialize in the production of commercial-grade ozone generators.

About Us:

Reports and Data is a market research and consulting company that provides syndicated research reports, customized research reports, and consulting services. Our solutions purely focus on your purpose to locate, target, and analyze consumer behavior shifts across demographics, across industries, and help clients to make smarter business decisions. We offer market intelligence studies ensuring relevant and fact-based research across multiple industries, including Healthcare, Touch Points, Chemicals, Products, and Energy. We consistently update our research offerings to ensure our clients are aware of the latest trends existent in the market. Reports and Data has a strong base of experienced analysts from varied areas of expertise. Our industry experience and ability to develop a concrete solution to any research problems provides our clients with the ability to secure an edge over their respective competitors.
