

Patient Registry Software Market Size Worth USD 2.96 Billion by 2027 - Emergen Research

Patient Registry Software Market Trends – increase in application of patient registry data for real-world evidence and post-marketing observation

VANCOUVER, BRITISH COLUMBIA, CANADA, May 4, 2023

/EINPresswire.com/ -- The Latest research study released by Emergen Research on "[Patient Registry Software Market](#)" with 150+ pages of analysis on business Strategy taken up by key and emerging industry players and delivers know how of the current market development, landscape, technologies, drivers, opportunities, market viewpoint and status. Understanding the segments helps in identifying the importance of different factors that leads the market growth.

“

Patient Registry Software Market Size – USD 1.10 Billion in 2019, Market Growth – at a CAGR of 13.9%”

Emergen Research

The global patient registry software market is forecast to reach a value of USD 2.96 Billion by 2027; according to a latest analysis by Emergen Research. The high projected value at the end of the seven-year forecast period can be attributed to the escalating demand for development and deployment of more specialized and advanced treatments and technologies in the global patient registry software market. Growth of the global patient registry software market is projected to further accelerate owing to

increasing application of Electronic Health Records (EHRs) in the global healthcare sector. Application and use of patient registry data for real-world evidence and post-marketing observation has been increasing over the past decade, and is expected to continue trend and drive market growth during the forecast period. Application and use of patient registry data for real-world evidence and post-marketing observation has been increasing over the past decade, and is expected to continue trend and drive market growth during the forecast period.
