

Automated Breast Ultrasound Market Analysis Report from 2023-27 | Demand, Trends, Forecast, Research by Emergen Research

Early detection is key in breast cancer treatment. The Automated Breast Ultrasound market is growing due to rising demand for advanced imaging technologies.

VANCOUVER, BC, CANADA, May 8, 2023 /EINPresswire.com/ -- Automated Breast Ultrasound (ABUS) is an advanced imaging technology used for breast cancer screening. It offers high-resolution images of the entire breast, which can help detect abnormalities that may be missed by mammography.

ABUS is particularly useful for women with dense breast tissue, which can make it difficult to detect tumors on a mammogram. The global ABUS market is growing, driven by the increasing incidence of breast cancer and rising demand for advanced imaging technologies.

“

Demand for advanced breast imaging technologies such as Automated Breast ”
Emergen Research

Early detection is crucial in breast cancer treatment. The global [Automated Breast Ultrasound market](#) is expected to grow due to increasing incidence of breast cancer and rising demand for advanced imaging technologies. The rising prevalence of breast cancer among women worldwide and the awareness of the connection between breast density and breast cancer is creating lucrative

opportunities for the automated breast ultrasound market. The automated breast ultrasound system uses high-frequency waves to scan the breast tissue and, through 3D images, detects cancer accurately in dense breast tissues. Specific automated breast ultrasound systems give results within minutes by using a touchscreen, transducer, automated compression, and intelligent imaging algorithms.

Key Automated Breast Ultrasound Market participants include

Siemens AG

General Electric Company

SonoCine, Inc.

Hitachi, Ltd.

Koninklijke Philips N.V.

Canon Medical Systems

Nova Medical Imaging Technology Co. Ltd.

Seno Medical Instruments

GE Healthcare

Delphinus Medical Technologies, Inc.

iVu Imaging Corporation

Others

Key inclusions of the Automated Breast Ultrasound Market report:

COVID-19 effects on growth figures.

Statistical analysis pertaining to market size, sales volume, and overall industry revenue.

Organized mentions of major market trends.

Growth opportunities.

Figures showcasing market growth rate.

Advantages and disadvantages of direct and indirect sales channels.

Insights regarding traders, distributors, and dealers present in the industry.

Access full Report Description, TOC, Table of Figure, Chart, etc. @

Geographically, this report studies the key regions, focuses on product sales, value, market share and growth opportunity in these regions, covering:

United States

Europe

China

Japan

Southeast Asia

India

We can also provide the customized separate regional or country-level reports, for the following regions:

North America, United States, Canada, Mexico, Asia-Pacific, China, India, Japan, South Korea, Australia, Indonesia, Singapore, Rest of Asia-Pacific, Europe, Germany, France, UK, Italy, Spain, Russia, Rest of Europe, Central & South America, Brazil, Argentina, Rest of South America, Middle East & Africa, Saudi Arabia, Turkey, Rest of Middle East & Africa

Global Automated Breast Ultrasound Market : Drivers and Restraints

Another driver of the ABUS market is the increasing focus on women's health and the need for early detection and diagnosis of breast cancer. ABUS can detect small tumors that may be missed by mammography, allowing for earlier treatment and better patient outcomes.

Additionally, the adoption of advanced technologies such as artificial intelligence (AI) and machine learning (ML) is expected to further drive the growth of the ABUS market. These technologies can help improve the accuracy and speed of ABUS imaging, leading to better

patient outcomes and more efficient healthcare delivery.

However, there are also some restraints that could potentially impact the growth of the ABUS market. One of the major challenges is the high cost of ABUS equipment and the limited availability in some regions. This can limit the adoption of ABUS technology, particularly in developing countries where healthcare infrastructure is lacking.

Another potential restraint is the lack of standardized protocols and guidelines for ABUS imaging, which can lead to variability in results and make it difficult to compare findings across different healthcare providers.

Thank you for reading our report. Customization of the report is available according to the requirements of clients. Kindly get in touch with us to know more about the report.

Key Benefits of the Report:

This study presents the analytical depiction of the Automated Breast Ultrasound Market along with the current trends and future estimations to determine the imminent investment pockets.

The report presents information related to key drivers, restraints, and opportunities along with challenges of the Automated Breast Ultrasound Market .

The current market is quantitatively analyzed from 2022 to 2030 to highlight the growth scenario of the Automated Breast Ultrasound Market .

The report provides a detailed Automated Breast Ultrasound Market analysis based on competitive intensity and the competition that will take shape in coming years.

Questions Answered in the Automated Breast Ultrasound Market Research Report:

Who are the leading market players active in the Automated Breast Ultrasound Market ?

What would be the detailed impact of COVID-19 on the market?

What are the current trends that would influence the market in the next few years?

What are the driving factors, restraints, and opportunities in the Automated Breast Ultrasound Market ?

What are the projections for the future that would help in taking further strategic steps?

About Emergen Research

Emergen Research is a Market research and consulting company that provides syndicated research reports, customized research reports, and consulting services. Our solutions purely focus on your purpose to locate, target, and analyze consumer behavior shifts across demographics, across industries, and help clients make smarter business decisions. We offer Market intelligence studies ensuring relevant and fact-based research across multiple industries, including Healthcare, Touch Points, Chemicals, Types, and Energy. We consistently update our research offerings to ensure our clients are aware of the latest trends existent in the market. Emergen Research has a strong base of experienced analysts from varied areas of expertise. Our industry experience and ability to develop a concrete solution to any research problems provides our clients with the ability to secure an edge over their respective competitors.
