Femtech (short for "female technology") refers to the use of technology to improve women's health and well-being. It includes products, services, and software that are specifically designed for women's health, such as period-tracking apps, fertility solutions, pregnancy and breastfeeding technology, sexual wellness devices, and menopause management tools.

The term "femtech" has gained popularity in recent years as more attention has been given to the unique health needs of women, and the growing number of female entrepreneurs and investors in the field. Femtech has the potential to improve women's health outcomes, increase access to care, and promote gender equity in healthcare.
