

Clean hydrogen's critical role towards a net-zero emissions future

To accelerate the transition and achieve this goal, World Hydrogen Week is THE only event to provide a strategic deal-making, knowledge building platform

LONDON, LONDON, UNITED KINGDOM, May 8, 2023

/EINPresswire.com/ -- "Even though there are so many promising signs that hydrogen is here to stay, progress and deployment need to move faster and further if we are to achieve the all-important end goal of a sustainable net-zero world", said World Hydrogen Leaders' Head of Production & Research, Megan Farbrother.

Press Release - World Hydrogen Week 9-13 October 2023 - Clean hydrogens critical role towards a net-zero emissions future

Forecasts suggest electrification won't suffice for about 40% of our total energy demand, urging the necessity for a green molecule market. With Algeria recently marking the 50th national hydrogen strategy or roadmap announcement globally, including almost all G20 countries, as well as pledges in the COP26 Breakthrough Agenda to drive the adoption of hydrogen technologies, worldwide momentum is clearly rising at pace.

“

Even though there are so many promising signs that hydrogen is here to stay, progress & deployment need to move faster...if we are to achieve the all-important end goal of a sustainable net-zero world”

Megan Farbrother, Head of Production & Research, World Hydrogen Leaders

We are also witnessing promising transition patterns across global regions and industry sectors in terms of hydrogen innovation. Startups are patenting more and more revolutionary technologies, while multinationals now have entire departments dedicated to transitioning their businesses to hydrogen. Hydrogen's end goal, and the journey there

To accelerate the transition and achieve this goal, World Hydrogen Week is THE only event to provide a strategic deal-making, knowledge building platform to seed vital innovation and collaboration. World Hydrogen Week combines 4 exclusive hydrogen focused events to offer a week-long programme of events: the 4th annual World Hydrogen Congress, World Hydrogen Intelligence Day and Global Hydrogen Projects Summit, as well as the inaugural World Hydrogen Derivatives conference. Check out the 2023 brochure for an overview of the pioneering and actionable insights on offer across a week of 4 dedicated event programmes.
