

Pepe On Chain: A New EVM Compatible Layer 1 Blockchain Project with Native Token \$POC

Pepe On Chain is proud to announce the launch of its new blockchain project, which aims to create a decentralized ecosystem for meme tokens.

UNITED STATES, May 8, 2023

/EINPresswire.com/ -- [Pepe On Chain](#) is proud to announce the launch of its new blockchain project, which aims to create a decentralized ecosystem for meme tokens. The platform is built on an EVM-compatible layer 1 blockchain and offers low gas fees and high-speed transactions.

One of the key features of Pepe On Chain is its native token, [\\$POC](#). The token has been minted on the Binance Smart Chain (BSC) network and will be available for trading soon. The fair launch of \$POC will be announced shortly.

“

"Pepe On Chain's vision is to create a decentralized ecosystem that empowers the meme token community to thrive," said a spokesperson. "With our low gas fees and high-speed transactions."

The Crypto Financial Times
UAE

"We're thrilled to introduce Pepe On Chain to the blockchain community," said a spokesperson for the project. "Our vision is to create a decentralized ecosystem that empowers the meme token community to thrive. With our low gas fees and high-speed transactions, we believe Pepe On Chain is well-positioned to become a leading player in the blockchain space."

Pepe On Chain offers a range of features that make it an attractive option for developers and investors alike. These include:

EVM compatibility: Pepe On Chain is built on an EVM-compatible layer 1 blockchain, making it easy for developers to create and deploy smart contracts.

Low gas fees: Pepe On Chain offers some of the lowest gas fees in the industry, making it an affordable option for users.

High-speed transactions: Pepe On Chain's blockchain can handle thousands of transactions per second, ensuring that users can transact quickly and efficiently.

\$PEPE token integration: Pepe On Chain will integrate \$PEPE, one of the most popular meme tokens, into its ecosystem. This integration will allow users to trade \$PEPE and other meme tokens on Pepe On Chain's decentralized exchange.

Pepe On Chain's launch is eagerly anticipated by the blockchain community, and the team is excited to bring its vision to life. Stay tuned for updates on the fair launch of \$POC and other developments from Pepe On Chain.

About Pepe On Chain

Pepe On Chain is an EVM-compatible layer 1 blockchain project that aims to create a decentralized ecosystem for meme tokens. The project offers low gas fees, high-speed transactions, and \$PEPE token integration. Pepe On Chain's native token, \$POC, has been minted on the Binance Smart Chain (BSC) network and will be available for trading soon.
