

# Non-Small Cell Lung Cancer Treatment Market Size, Share, Price, Trends, Growth, Analysis, Report and Forecast 2023-2028

*Global Non-Small Cell Lung Cancer Treatment Market Size To Grow At A CAGR Of 8.8% During The Forecast Period Of 2023-2031*

SHERIDAN, WYOMING, UNITED STATES, May 9, 2023 /EINPresswire.com/ -- The 'Global [Non-Small Cell Lung Cancer Treatment Market Size](#), Share, Price, Trends, Growth, Report and Forecast 2023-2031' by Expert Market Research gives an extensive outlook of the global non-small cell lung cancer treatment

market, assessing the market on the basis of its segments like indication type, therapy type, drug class, distribution channel, and major regions.

The report studies the latest updates in the market, along with their impact across the market. It also analyses the market demand, together with its price and demand indicators. The report also tracks the market on the bases of SWOT and Porter's Five Forces Models.

Non-Small Cell Lung Cancer Treatment Market Size, Share, Price, Trends, Growth, Analysis, Outlook, Report and Forecast

The key highlights of the report include:

Market Overview (2016-2031)

Forecast CAGR (2023-2031): 8.8%

The growth of the non-small cell lung cancer treatment market is being driven by factors like the increasing incidence of lung cancer, advancements in technology and treatment options, and an ageing population. The increased funding for research and development in the field, along with the growing awareness of the disease and its risk factors, may also contribute to market

growth.

Among the regional markets, North America is expected to hold the largest share due to the high prevalence of lung cancer, the presence of advanced healthcare infrastructure, and the availability of advanced treatment options. Europe is also expected to hold a significant share of the market due to the high incidence of lung cancer, the presence of well-established healthcare systems, and the availability of advanced treatment options. The Asia Pacific region is expected to grow at the fastest rate due to the increasing incidence of lung cancer, the growing healthcare expenditure, and the increasing awareness about the disease.

Non-Small Cell Lung Cancer Treatment Market Segmentation (Industry Definition and Major Segments)

Non-Small Cell Lung Cancer (NSCLC) is a type of lung cancer that is characterised by the presence of cancerous cells that do not form small, round clusters. These cells are typically larger and more irregular in shape. NSCLC is the most common type of lung cancer, accounting for about 80-85% of all lung cancer cases. There are several subtypes of NSCLC, including adenocarcinoma, squamous cell carcinoma, and large cell carcinoma. Symptoms of NSCLC include cough, chest pain, shortness of breath, and weight loss.

Market Breakup by Indication Type

- Adenocarcinoma
- Squamous Cell Carcinoma
- Large Cell Carcinoma
- Others

Market Breakup by Therapy Type

- Immunotherapy
  - Nivolumab (Opdivo)
  - Atezolizumab (Tecentriq)
- Chemotherapy
- Targeted Therapy
  - Bevacizumab (Avastin)
  - Necitumumab (Portrazza)

Ramucirumab (Cyramza)

Others

## Market by Drug Class

Angiogenesis Inhibitors

Epidermal Growth Factor Receptor Blockers

Kinase Inhibitors

Microtubule Stabilizers

Folate Antimetabolites

PD-1/ PD-L1 Inhibitors

Others

## Market Breakup by Distribution Channel

Hospital Pharmacies

Retail Pharmacies

Online Pharmacies

Others

## Market Breakup by Region

North America

Europe

Asia Pacific

Middle East and Africa

Latin America

## Non-Small Cell Lung Cancer Treatment Market Trends

The growth of the market largely benefits from the technological advancements. The development of new and advanced treatment options, such as immunotherapy, targeted therapy, and combination therapy, is driving the growth of the market. These treatments have shown to be more effective in improving survival rates and reducing the side effects of chemotherapy.

The rising geriatric population is another major driver for the non-small cell lung cancer treatment market. The elderly population is more susceptible to lung cancer due to their increased exposure to environmental and occupational risk factors, and the prevalence of smoking.

The increasing healthcare expenditure and rising government support for cancer research and treatment is propelling the growth of the non-small cell lung cancer treatment market. Many governments and private organisations are investing heavily in cancer research and

development, which is leading to the launch of new and innovative treatment options.

The increasing awareness about lung cancer and its symptoms is aiding the growth of the non-small cell lung cancer treatment market. Many government and private organizations are conducting campaigns to raise awareness about the disease, which is encouraging more people to seek early diagnosis and treatment.

### Key Market Players

The key players in the non-small cell lung cancer treatment market report are:

Genentech, Inc. (F. Hoffmann-La Roche Ltd)  
Eli Lilly and Company  
Celgene Corporation (Bristol-Myers Squibb Company)  
AstraZeneca  
Pfizer Inc.  
Sanofi  
Novartis AG  
Astellas Pharma Inc.  
Boehringer Ingelheim International GmbH  
Merck & Co., Inc.  
Takeda Pharmaceutical Company Limited

The report covers the market shares, capacities, plant turnarounds, expansions, investments and mergers and acquisitions, among other latest developments of these market players.
