## Urology Devices Market Driving Factors

**Increasing prevalence of urological disorders:** The rising incidence of urological disorders such as kidney stones, urinary incontinence, prostate cancer, and bladder cancer is driving the demand for urology devices. According to the World Health Organization, kidney stones affect

approximately 1 in 10 people worldwide.

**Technological advancements:** Advancements in technology have led to the development of minimally invasive procedures, which are less painful and have a shorter recovery time. This has led to increased adoption of urology devices such as ureteroscopy, cystoscopes, and lithotripters.

**Aging population:** The aging population is more prone to urological disorders, which is driving the demand for urology devices. According to the United Nations, the number of people aged 60 years and above is expected to reach 2.1 billion by 2050.

**Increasing healthcare expenditure:** The increasing healthcare expenditure in developing countries is driving the demand for urology devices. Governments are investing in the development of healthcare infrastructure and are providing funding for the treatment of urological disorders.

**Growing awareness about urological disorders:** The growing awareness about urological disorders and the availability of treatment options is driving the demand for urology devices. Patients are becoming more proactive about their health and are seeking medical attention for urological disorders.
