Increase in foreign deployment of armed forces and rising demand for firepower support on the battlefield are driving market revenue growth. Gunpowder, explosives, and other fillers are used in large caliber ammunition, and this ammunition has the potential to cause damage to the target or other tactical ordnance missions. It can be utilized in a variety of missions, as well as against air, naval, and ground targets. Major companies have created large caliber ammunition with a variety of characteristics, including target practice tracer, high explosive dual purpose, armor-piercing dual purpose with self-destruction, and anti-personnel tracer. Depending on the projectile type and needs, these large-caliber ammunition

rounds are used in a range of military applications.

Economic, legal, and political frameworks vary from country to country, resulting in varying restrictions governing weaponry, ammunition, and other military equipment, which is expected to be a major restraint for market revenue growth. This is one of the most important issues to affect major participants in the ammunition industry. Despite this disadvantage, several benefits and advantages provided by large caliber ammunition are likely to increase their deployment during the forecast period.
