Mary Dermcare has recently added the Rohrer Aesthetics' Pixel8 RF Microneedling and Spectrum Laser devices among the many new, cutting-edge aesthetic treatments to the Midtown Manhattan area.

The Pixel8 is a state-of-the-art radio frequency (RF) micro-needling system. This radio frequency micro-needling

system provides the latest skin tightening and collagen induction therapy advancement. In the hands of our trained practitioners, this system combines the collagen-stimulating effect of micro-needling with the skin-tightening effect of radio-frequency to provide patients with meaningful improvements to their skin. Some modalities treated with [RF micro-needling](#) include fine lines and wrinkles, enlarged pores, stretch marks, facial acne scars, crepey skin, uneven skin tone, and many more.

The Spectrum device offers patients the latest effective laser hair removal for small and large areas with built-in contact cooling for exceptional patient comfort. The system also has an advanced filter system that allows us to offer patients intense pulsed light (IPL) procedures, which treat various minor skin irregularities and conditions, including red and brown spots, vascular reduction, broken facial capillaries, and acne, as well as many others. Additionally, we can offer safe and effective laser peels and modern photo facials.
