pCloudy Announces Integration with Katalon for Enhanced App Testing Experience

pCloudy and Katalon collaborate to help users create and execute Katalon automation scripts directly from pCloudy's real device cloud-based testing platform.

DUBLIN, CA, UNITED STATES, May 16, 2023 /EINPresswire.com/ -- pCloudy, the leading real device cloud-based testing platform, has announced its integration with Katalon, a leading software quality management platform for web, mobile, API, and desktop applications. This collaboration will offer customers a seamless automated testing experience by allowing them to create and execute Katalon automation scripts on pCloudy directly from Katalon Studio.

> "Our integration with Katalon provides a powerful app testing platform that delivers AI-driven automated testing across thousands of devices, browsers, and OS combinations."
>
> *Shibu Kumar Panda, Senior Lead - Software Developer*

With the ever-increasing mobile app adoption, ensuring that applications are rigorously tested before release is crucial for providing a high-quality user experience. The integration of pCloudy with Katalon will provide an optimized and efficient way to perform automated app testing on real devices. This will result in a more efficient and effective testing process, enabling faster delivery of high-quality applications.

"App testing is critical for the success of any enterprise. Poor testing can negatively impact user experience, leading to a damaged brand reputation. Our integration with Katalon provides a powerful app testing platform that delivers AI-driven automated testing across thousands of devices, browsers, and OS combinations. This will significantly accelerate testing and help our customers rapidly scale," said Shibu Kumar Panda, Senior Lead - Software Developer at pCloudy.

In addition to automated testing, the integration will enable users to make use of Katalon'srecord and playback feature, offering a more efficient way of test automation script development. Furthermore, customers will also be able to leverage Katalon's advanced reporting capabilities to track and analyze their app test results.

The integration of pCloudy with the Katalon platform is available for all customers from today. For more information, please visit https://www.pcloudy.com/docs/katalon-studio

About pCloudy

pCloudy is a cloud based testing platform that offers a diverse range of over 5000+ real device and browser combinations for testing mobile and web applications.
