

Neakasa NoMo N3: The Smart Robot Vacuum Companion - Pre-Sale Event Now Open

LOS ANGELES, CA, USA, May 16, 2023

[/EINPresswire.com/](https://www.einpresswire.com/) -- As a leading Innovator in Smart Cleaning Technology, Neakasa has recently launched its latest innovation, the Neakasa NoMo N3 - a self-emptying 3-in-1 robot vacuum. Packed with advanced features such as powerful suction capabilities, LIDAR Navigation, and SLAM technology, the Neakasa NoMo N3 is truly a next-gen cleaning companion that can revolutionize your home cleaning routine.

Come to know [Neakasa NoMo N3 Robot Vacuum](#)

4000 Pa maximum suction

Easily collects pet hair and dirt from hard floors, rugs and rugs with a 4000Pa suction.

Automatically boosts suction power when carpet is detected and offers 4 suction modes for all our cleaning needs.

NoMo N3 has 4 suction modes, including Quiet Mode (650Pa), Standard Mode (1500Pa), Strong Mode (2500Pa) and Max Mode (4000Pa). When it detects a carpeted area, it automatically increases the suction power to ensure a thorough clean. With impressive suction power, this robot vacuum easily and effectively picks up dirt, crumbs, and pet hair from carpets and hard floor.

Sweep, mop and vacuum 3 in 1

The major benefit of 3-in-1 appliances is that they can perform the task of sweeping, mopping, and vacuuming in one pass, saving users time and effort. With just one device, maintenance is convenient and cleaning times can be cut in half, allowing people to enjoy more time doing things they love.

These appliances are easily adaptable to different types of flooring such as wooden floors, tile floors, laminate floors, carpets, or rugs. This means people can clean their entire home thoroughly with only one appliance.

Self-empty function

One of the standout features of the NoMo N3 is its extra large 250ml self-emptying bin. After the robot completes its mission, it returns to the charging station and automatically empties its contents into a bin. The waste bin has a capacity of up to 2.5 liters and can hold waste for approximately 45 days without having to be emptied manually every day.

The LED display on the self-cleaning station also reminds people when the dust bag needs to be replaced, the robot is recharged or the contents are emptied, making the process easier and more hygienic.

Battery Life and Navigation

Equipped with a powerful 5200mAh battery, the NoMo N3 can provide 320 minutes of long-lasting cleaning time for a space of approximately 200m² (2150ft²). This allows the robot to cover large areas in one cleaning session without frequent recharging. The anti-fall cliff sensor prevents the robot from falling down the stairs, ensuring safe operation.

Cleaning performance

The powerful 4000Pa suction power of the Neakasa Nomo N3 makes it one of the most powerful robot vacuum cleaners on the market. It has advanced lidar navigation and SLAM technology, creating intelligent mapping and routing, which can help people clean every corner of your home. In addition, its compact body design makes it easy to navigate under the bed and sofa, cleaning the dead corners that people usually can't clean.

Turn \$1 into \$100

Preorder the NoMo N3 for just \$1 during May 14 to May 27. Get a \$100 discount on the final price, including a \$50 coupon code and a \$50 Amazon coupon.
