Based on end-user, the pharmaceuticals industry segment accounted for the largest market share in 2020, contributing to around one-fifth of the total share, and is expected to maintain the lead throughout the forecast period. Moreover, the same segment is estimated to witness the fastest CAGR of 18.0% from 2021 to 2030. The report also covers segments such as the aerospace industry, disk drives industry, flat panels industry, food industry, hospitals, medical devices industry, and semiconductor industry.

Based on product, the non-sterile segment contributed to the highest market share in 2020, attributing to more than two-thirds of the total market share, and is anticipated to dominate the market during the forecast period. On the other hand, the sterile segment is expected to

manifest the fastest CAGR of 13.6% from 2021-2030.

By Material Type

Natural Rubber Gloves

Vinyl Gloves

Nitrile Gloves

Neoprene Gloves

Others

Large consumer base and strict regulations fuel the Europe cleanroom disposable gloves market. On the other hand, rise in the installation of industrial robots in the semiconductors sector hampers the market growth. On the contrary, rise in the trend of cleanroom spaces creates several opportunities.

Based on region, Germany contributed to the highest share in 2020, holding more than one-fifth of the total share, and is expected to maintain dominance during the forecast period. The Europe cleanroom disposable gloves market across Finland is anticipated to exhibit the fastest CAGR of 20.9% during the forecast period.

COVID-19 scenario:

The spread of COVID-19 increased the demand for cleanroom disposable gloves from the pharmaceutical & medical devices sector and hospitals.

Multinational companies had to face lockdown restrictions in different countries and this hindered manufacturing operations during the pandemic.

Procurement of raw materials was challenging owing to the disruption in logistics.

The COVID-19 spread in China and around the world had impacted the healthcare system and health expenditure. This has positively impacted the demand for cleanroom consumables such as disposable gloves.

Preventive practices followed by medical staff such as double gloving and frequent change of gloves have caused an increase in the use of gloves.
