

Manual Wheelchair Market Expedition Growth Expected in Coming Years | Trends and Innovation Opening Up New Avenues

Asia-Pacific is the two potential markets, expected to witness growth during the forecast period

PORTLAND, 5933 NE WIN SIVERS DRIVE, #205, UNITED STATE, May 16, 2023 /EINPresswire.com/ -- According to a new report published by Allied Market Research, titled, "[Manual Wheelchair Market](#) by Category, Design & Function, and End User: Global Opportunity Analysis and Industry Forecast, 2018 - 2025," the global manual wheelchair market was valued at \$2,609.7 million in 2017 and is projected to reach \$4,099.1 million by

2025, registering a CAGR of 5.8% from 2018 to 2025. Manual wheelchairs are specifically designed for use by individuals with mobility, lower extremity, and spinal cord disabilities. Specific needs regarding style, weight, comfort, and performance are taken into consideration while designing these chairs. These chairs help individuals to prevent pressure ulcers and shoulder injuries as well as help maintain a good posture. Various features and accessories are added to the chair to cater to the requirements of the end user. These include fixed or detachable arms, fixed or adjustable height, and full length or desk length arm.

Other factors such as rise in spinal cord injuries, rise in incidence of disabilities, and accidents coupled with growth in government expenditure on healthcare are expected to open new avenues for the manual wheelchair market players in the future. However, inclination of consumer toward electric and automated wheelchairs hinder the growth of the manual wheelchair market. Emerging trends that have a direct impact on the dynamics of the wheelchair industry, include improved wheelchair efficiency to provide more comfort and convenience, increase in adoption of power assistance device, and rise in adoption of hybrid concept in

wheelchair. In addition, greater strength and durability of material along with less moving parts have considerably reduced the maintenance cost that leads to increased adoption of adult wheel chair. Thus, recent advancements in material and engineering design of manual wheelchair are expected to drive the growth of the wheelchair market during the forecast period.

Key Findings of the Manual Wheelchair Market:

Based on category, the adult wheelchair segment accounted for around 63% in the manual wheelchair market share in 2017, growing at a CAGR of 6.1% from 2018 to 2025.

The pediatric wheelchair segment accounted for around 37% market share, growing at a CAGR of 6.3% from 2018 to 2025.

Based on design & function, the basic wheelchair segment accounted for 48% of the market share in 2017 and is expected to growth at the highest CAGR of 6.4%.

Based on end user, the homecare wheelchair segment occupied around 21% of the market share and is expected to grow at the highest CAGR of 6.4%.

Based on region, North America accounted for a prominent market share in 2017 and is anticipated to grow at a CAGR of 5.3% throughout the forecast period.

North America and Europe, together accounted for about 63.4% of the total global manual wheelchair market in 2018, with the former constituting around 33.4%. From a growth perspective, Asia-Pacific and LAMEA are the two potential markets, expected to witness growth during the forecast period. At present, these two segments account for 36.6% of the manual wheelchair market share.
