*Agrochemicals Market to Reach USD 278.87 Billion by 2028, Driven by Growing Demand for Sustainable Agriculture*

SHERIDAN, WYOMING, UNITED STATES,  
May 16, 2023 /EINPresswire.com/ --  
Agrochemicals Market Outlook:

According to a new report by Expert Market Research titled "[Global Agrochemicals Market Size](#), Share, Analysis, Report, Demand, Forecast 2023-2028", the global agrochemicals market was valued at USD 233.1 billion in 2022 and is expected to reach USD 278.87 billion by 2028, growing at a CAGR of 3.18% during the forecast period 2023-2028.

The agrochemicals market is a significant component of the agricultural industry, providing farmers with essential tools to improve crop yields, protect their crops from pests and diseases, and increase food production. The global agrochemicals market has been growing steadily over the past few years, and this trend is expected to continue in the coming years.

The agrochemicals market is driven by factors such as population growth, rising food demand, and the need to increase agricultural productivity. In addition, the adoption of advanced farming technologies, such as precision agriculture, is also contributing to the growth of the agrochemicals market.

Market Segmentation:

The agrochemicals market is segmented based on type, application, and region.

## Type:

The agrochemicals market can be segmented into fertilizers, pesticides, and others. Among these, fertilizers are the largest segment, accounting for more than half of the global agrochemicals market in 2020. The demand for fertilizers is driven by the need to increase crop yields and improve soil quality.

## Application:

The agrochemicals market can be segmented into crop-based and non-crop-based applications. Crop-based applications are the largest segment, accounting for more than 80% of the global agrochemicals market in 2020. The demand for agrochemicals in crop-based applications is driven by the need to protect crops from pests and diseases and increase crop yields.

## Region:

The agrochemicals market can be segmented into North America, Europe, Asia-Pacific, South America, and the Middle East & Africa. Asia-Pacific is the largest market, accounting for more than 40% of the global agrochemicals market in 2020. The high demand for agrochemicals in this region is driven by the large population, increasing food demand, and the need to improve agricultural productivity.

## Market Trends:

The agrochemicals market is witnessing several trends that are expected to shape the industry in the coming years. Some of these trends are:

**Increasing adoption of bio-based agrochemicals:** With growing environmental concerns and the need for sustainable agriculture, there is an increasing demand for bio-based agrochemicals. Bio-based agrochemicals are derived from natural sources and are less harmful to the environment.

**Growing demand for precision agriculture:** Precision agriculture is a farming technique that uses technology such as GPS and sensors to optimize crop yields and reduce waste. This technique is gaining popularity among farmers, and the demand for agrochemicals used in precision agriculture is expected to grow in the coming years.

**Consolidation in the agrochemicals industry:** The agrochemicals industry is witnessing consolidation, with large companies acquiring smaller players to expand their product portfolio

and increase their market share.

Increasing focus on sustainable agriculture: With the growing need for sustainable agriculture, there is an increasing focus on reducing the use of chemical fertilizers and pesticides. This is expected to drive the demand for bio-based agrochemicals in the coming years.

FAQs:

Q: What is the expected size of the global agrochemicals market by 2028?

A: The global agrochemicals market is expected to reach USD 278.87 billion by 2028, growing at a CAGR of 3.18% during the forecast period (2023-2028).

Q: What are the factors driving the growth of the agrochemicals market?

A: The growth of the agrochemicals market is driven by factors such as population growth, rising food demand, and the need to increase agricultural productivity.

Q: What is the largest segment of the agrochemicals market?

A: Fertilizers are the largest segment of the agrochemicals market, accounting for more than half of the global market in 2020.

Q: What is precision agriculture, and how is it impacting the agrochemicals market?

A: Precision agriculture is a farming technique that uses technology such as GPS and sensors to optimize crop yields and reduce waste. The demand for agrochemicals used in precision agriculture is expected to grow in the coming years.

Q: What is bio-based agrochemicals, and why is there an increasing demand for it?

A: Bio-based agrochemicals are derived from natural sources and are less harmful to the environment. With growing environmental concerns and the need for sustainable agriculture, there is an increasing demand for bio-based agrochemicals.

Q: What is the region with the largest market share in the agrochemicals market?

A: Asia-Pacific is the largest market for agrochemicals, accounting for more than 40% of the global market in 2020.

Q: What are the challenges faced by the agrochemicals industry?

A: The agrochemicals industry faces challenges such as environmental concerns, regulatory hurdles, and the need to develop sustainable and eco-friendly solutions.

Q: How is consolidation impacting the agrochemicals industry?

A: The agrochemicals industry is witnessing consolidation, with large companies acquiring smaller players to expand their product portfolio and increase their market share.

Q: How is the trend towards sustainable agriculture impacting the agrochemicals market?

A: With the growing need for sustainable agriculture, there is an increasing focus on reducing the use of chemical fertilizers and pesticides. This is expected to drive the demand for bio-based agrochemicals in the coming years.

Q: What are some of the key players in the agrochemicals market?

A: Some of the key players in the agrochemicals market are BASF SE, Syngenta AG, Bayer AG, Dow Chemical Company, and Monsanto Company.
