“The way education is moving, more and more of our treatments have become digitally focused and digitally delivered,” Dr. Gruber says when speaking about how his practice performs. “We are committed to embracing this change and are excited about the many opportunities and the many directions our profession will be going in the future,” he adds.

A few of the new technologies Gruber Dental utilizes include 3D CBCT scans, digital caries detection, diagnostic intraoral cameras, cosmetic computer imaging, and digital impressions for perfect-fitting restorations.

Dr. Gruber also works to ensure his community recognizes the importance of oral health, outside of his practice. He is the founder and director of the Children’s Dental Center of the Boys and Girls Club of Newark, which provides free services to underprivileged children, and is an attending dentist who teaches dental residents at Morristown Medical Center.
