Supportive environmental regulations for low VOC coating additives and rise in number of applications in several end-user industries drive the growth of the global coating additives market. On the other hand, strict environments dictums restrain the growth to some extent.

This makes it important to understand the practical implications of the Coating additives market. To gain a competitive advantage, the players must have something unique. By tapping into the untapped market segment, they can establish a relevant point of differentiation, and this report offers an extension analysis of untapped segments to benefit the market players and new entrants to gain the market share.

As per the report, the global coating additives industry was accounted for "\$9.0 billion" in 2020, and is expected to reach "\$15.0 billion" by 2030, growing at a CAGR of 5.5% from 2021 to 2030.

KEY MARKET PLAYERS:

The report provides the SWOT analysis of the key market players Arkema, BASF, BYK Additives & Instruments, Clariant, Dow Chemical Co., Eastman Chemical Co., Evonik, Lanxess, Momentive Performance Materials Inc., and Solvay. which gives the business overview, financial analysis, and portfolio analysis of products and services. The latest news related to industry developments in terms of market expansions, acquisitions, growth strategies, joint ventures, collaborations, product launches, market expansions etc. are included in the report for the better understanding of the stakeholders in framing strategic decisions to gain long term profitability and market share.

The market across "Asia-Pacific, followed by Europe and North America," accounted for the major share in 2020, contributing to around half of the global coating additives market. This is because Asia-Pacific has a large consumer of coating additives. The same region "is also expected to cite the fastest CAGR of 6.1% throughout the forecast period.

NEED FOR THE REPORT:

The current situation of pandemic makes it very important for the stakeholders in the Coating additives market to understand the market deeply, which will help them in taking sound decisions, to gain the competitive advantage. By exploring the unexplored areas of market, the key players can surely gain a larger market share.

The rheology modification segment held the major share in 2020, generating nearly one-fourth half of the global coating additives market, owing to increase in usage of rheology additives as it provides film thickness, increases viscosity of finished products, and improves elastic properties of coatings. The same segment is also projected to cite the fastest CAGR of 5.8% during the forecast period.

KEY OFFERINGS OF THE REPORT:

Key drivers & Opportunities: An extensive analysis on key factors and opportunities available in different segments for strategizing.

Current trends & forecasts: A comprehensive analysis on latest trends, and forecasts for next few years to frame strategic decisions as a next step.

Segmental analysis: An extensive analysis of each segment and driving factors such as revenue and growth rate is offered.

Regional Analysis: A thorough analysis of each geographic region can help market players devise expansion strategies and gain from the opportunity.

Competitive Landscape: Useful insights on each of the leading market players for outlining competitive scenario and related strategies have been offered in the report.
