The platform's built-in AI Text service allows agents and agencies to create

The industry's favorite CRM just got even smarter

Introducing InsuredMine AI

BOOK A DEMO

InsuredMine announces the launch of their new AI feature for the CRM's users.

compelling text content for emails, text messages, and campaigns effortlessly. This exciting new feature is intuitive and user-friendly, utilizing tone and translation features to draft custom copy that delivers the right message for different communication modules in the CRM experience.

> "
> We have always been laser-focused on automation and customer satisfaction, and delivering this AI experience truly elevates our core value proposition."
> *Raution Jaiswal, InsuredMine CEO and founder*

InsuredMine's powerful AI Text feature simplifies the management of accounts, contacts, and engagements by streamlining note addition and editing, sending texts and emails, bulk communications, and email campaigns. With this upgrade, agents need only input the fundamental idea and message of the communication, and six options will be displayed. The user selects the best-suited option for the situation, depending on tone and translation, and the text is adjusted accordingly.

The six options for text transformation make using this feature turnkey and effective, covering an array of messaging strategies:

- Expand
- Rephrase
- Make more formal

- Make more friendly
- Translate to English
- Translate to Spanish

Once the agent inputs their text, they can click once to hone their communication to resonate with their desired audience in their preferred tone, voice, and language.

This latest feature solidifies InsuredMine as the leader in Insurance CRM, empowering Insurance Agents by fostering better engagement and communication through technology that enhances customer relationships.

Raution Jaiswal, InsuredMine's CEO and founder, is excited about the potential of the new feature. "What sets InsuredMine apart is our dedication to being the premier Insurance CRM," he said. "Implementing our AI Text feature makes perfect sense. We have always been laser-focused on automation and customer satisfaction, and delivering this AI experience truly elevates our core value proposition."
