Pigmentation disorder treatment market is expected to reach **\$1.2 Billion** in 2031

Growing at a **CAGR of 4.3%** (2022-2031)

Report Code: A11229  
www.alliedmarketresearch.com

Pigmentation Disorder Treatment Market

- By type, the vitiligo segment was the highest contributor to the market in 2021.
- By treatment, the corticosteroids segment was the highest contributor to the market in 2021.
- By distribution channel, the hospital pharmacies segment was highest contributor in 2021, and is expected to continue this trend during the forecast period.
- Region wise, North America held the largest revenue share in 2021, whereas Asia-Pacific is anticipated to grow at the highest CAGR during the forecast period.

North America accounted for a majority of the global pigmentation disorder treatment market share in 2021, and is anticipated to remain dominant during the forecast period. This is attributed to rise in awareness and prevalence of the pigmentation disorders, and presence of key and robust healthcare infrastructure in the region. However, Asia-Pacific is anticipated to witness notable growth, owing to rise in prevalence of pigmentation disorders, development of healthcare infrastructure and increase in investments projects in the region.
