The increasing health consciousness across the country is leading to a heightened demand for organic, natural, and health boosting food and beverage products. This factor is fuelling the demand for soluble dietary fibre-based functional food and beverage products. Over the forecast period, the increasing prevalence of sedentary lifestyles among the working population and inadequate intake of nutritional foods are expected to bolster the sale of clean-labelled soluble dietary fibre-based food products such as oats.

Furthermore, the medicinal properties of soluble dietary fibre, which include intestine stimulation and promotion of bowel movement, is expected to increase the application of the product in the pharmaceutical sector. Accordingly, the thriving pharmaceutical sector across the country is expected to garner the South Korea soluble dietary fibre market growth in the forecast period.

#### South Korea Soluble Dietary Fibre Industry Definition and Major Segments

Soluble dietary fibre is defined as an indigestible part of a plant which when dispersed in water, creates a viscous gel without getting dissolved in it. Soluble dietary fibre is present in several types of food items such as oats, apples, citrus fruits, and peas, among others. Upon consumption, it forms a viscous gel in the gastrointestinal tract, aiding health in multiple ways.
