The key highlights of the report include:

Market Overview (2018-2028)

Forecast CAGR (2023-2028): 9.1%

The growing use of polyglycerol in the cosmetics and personal care industries has aided in the growth of the global polyglycerol market. In the food and beverage industry, polyglycerol polyricinoleate, polyglycerol esters, and polyglycerol sebacate are widely utilised as additives and emulsifiers. As a result, rising demand from the food and beverage industry is assisting the

market's expansion.

Furthermore, the introduction of clean label personal care products, as well as greater awareness of chemical hazards, are driving up demand for natural and biodegradable polyglycerol, which is contributing significantly to market growth. Market growth is being fueled by the rapid and effective development of several technologies that aid in the balancing of various types of emulsifiers.

Polyglycerol Industry Definition and Major Segments

Polyglycerol is an emulsifier made from polymerised glycerol reacting with edible oils and fatty acids to produce mixed partial esters. It is used in several industries, including food and beverage, pharmaceuticals, and food and beverage. It is soluble in oils and organic solvents and is hydrophilic and lipophilic in nature.

By Product, the market is divided into:

- Polyglycerol-2 (PG-2)
- Polyglycerol-3 (PG-3)
- Polyglycerol-4 (PG-4)
- Polyglycerol-6 (PG-6)
- Polyglycerol-10 (PG-10)

By application, the market is divided into:

- Food and Beverage
- Pharmaceuticals
- Personal Care
- Others

The global regions for radiology positioning aids market include:

- North America
- Europe
- Asia Pacific
- Latin America
- Middle East and Africa

Polyglycerol Market Trends

Rising need for saturated polymeric emulsifiers is augmenting the demand for polyglycerol-2-dipolyhydroxy stearate, fueling the polyglycerol industry's growth. Polyglycerol is increasingly being used to thicken and emulsify solvents in several innovative skincare products, such as micellar water, as they gain popularity. As a result, demand for polyglycerol rises, fuelling industrial growth. Polyglycerol is increasingly being used in baking to stabilise foams and promote aeration in order to boost the sponginess of batters and cakes, which helps to drive market growth.

Furthermore, the growing usage of polyglycerol as a preservative, colourant, and emulsifier in a wide range of food and beverage products is propelling market growth. In addition, rising demand for ice cream, cookies, meat products, and chocolates is boosting polyglycerol's use as an emulsifier, driving growing demand for the product. This trend is projected to continue in the near future, as convenience and packaged food become more popular, boosting industry growth during the forecast period.

Key Market Players

The major players in the market are BASF SE, Sakamoto Yakuhi Kogyo Co., Ltd., Oleon NV. , Spiga Nord S.p.A., Lonza Group Ltd., and others. The report covers the market shares, capacities, plant turnarounds, expansions, investments and mergers and acquisitions, among other latest developments of these market players.
