The [North America slide rails market](#) size for home appliances is expected to reach \$17,173.0 million in 2027, from \$12,500.0 million in 2019, growing at a CAGR of 4.1% from 2020 to 2027. The majority of the slide rails market is concentrated in the United States and Canada. The US had a 93.9% share of the North American slide rails market in 2019, while Canada had a 6.1% share.

The main driving force behind the growth of the North American slide rails market is the increasing demand for convenience and ease of use. Slide rails make it easier to open and close drawers, doors, and other features. They also provide support for heavier objects, preventing accidental tipping or crashing. Additionally, slide rails are becoming increasingly popular in home appliances due to their ease of installation, increased durability, and ability to fit into small spaces. Other factors contributing to the growth of the North American slide rails market include the rising purchasing power of consumers, the increasing use of sophisticated materials, and the

availability of attractive discounts and offers.
