Brewing Enzymes Market Rising demand for craft beers around the world are key Driving Factor of Market Growth During Forecast period

NEW YORK CITY, NEW YORK, UNITED STATES, May 24, 2023

/EINPresswire.com/ -- The global [brewing enzymes market](#) size was USD 407.9 Million in 2022 and is expected

to register a revenue CAGR of 6.7% during the forecast period. Rising demand for craft beers around the world, increasing number of breweries in developed and many developing countries, and relaxed government regulations in many countries are some of the key factors driving market revenue growth.

Enzymes are complex organic components that act as catalysts and result in accelerating the velocity of a reaction while remaining essentially unchanged in the entire process. They encourage the hydrolysis of proteins and polysaccharides into simpler substances. Such technological innovation, rising consumer base, and introduction of new products in the market on a regular basis are factors driving revenue growth of the brewing enzyme market. Increasing number of small and micro-breweries across the globe is also expected to drive revenue growth of the market. For instance, The Brewers Association, which is a not-for-profit trade association, consisting of small and independent brewers present in America, published a mid-year survey report in 2020, a 4% production growth witnessed year over year for small and independent U.S. breweries.
