

Announcing LaserMinter: powered by Decentryk

Decentryk has launched the LaserMinter range of products for minting Phygital Passports using its game-changing laser-blockchain technology.

MIAMI, FLORIDA, USA, May 25, 2023
/EINPresswire.com/ -- Announcing
LaserMinter: powered by Decentryk

Digitizing the Physical World!

Decentryk has released a limited number of LaserMinter products for minting Phygital Passports using its revolutionary laser-blockchain authentication technology.

Phygital Passports permanently connect a digital identity to a real-world physical item. This provides for anti-counterfeit protection, item provenance and valuation tracking, and metaverse-ready NFT sales for all types of luxury products, from bottles of fine wine and spirits, to watches and jewelry, to exotic cars.

Decentryk's patented phygital technology that combines ultra-hi-resolution laser engraving hardware with 3FA verified NFT software technology. [Find out more by reading the case studies at laserminter.com](#) or [visit decentryk.com to view the explainer video.](#)

[There is a limited release of 50 LaserMinter units available for pre-order.](#) Order now to begin the journey to provide Phygital Passports for your luxury product or collectible creation.

Digitizing the Real World

The potential market for
Phygital Passport
technology is truly massive
(> \$500 Billion). It can apply
to many types of luxury
goods, from wine and spirits
to fashion to vintage and
exotic cars.”
