

Aircraft Mounts Market size is projected to reach USD 1,491.41 Million by 2032 | Emergen Research

Rising emphasis on enhancing safety and comfort in aircraft is a significant factor driving global aircraft mounts market revenue growth

VANCOUVER, B.C, CANADA, May 25, 2023 /EINPresswire.com/ -- According to the most recent analysis by Emergen Research, the size of the worldwide [aircraft mounts market](#) is anticipated to reach USD 1,491.41 Million in 2032 and show a revenue CAGR of 7.2% during the projected period. The primary element fueling the market revenue growth is the increasing significance of engine mounts for supporting engines and transmitting loads. An engine mount is a base that joins the engine to the frame or main body of the aircraft.

“

Aircraft Mounts Market Size – USD 745.00 Million in 2022, Market Growth – at a CAGR of 7.2%, Market Trends – Rising importance of engine mounts to support the engine and transmitting loads”

Emergen Research

It serves a number of purposes, such as connecting the engine to the fuselage and safely spreading engine vibrations throughout the aircraft structure for a smooth flight, all of which help to drive the market's revenue growth. The weight of the engine must be balanced by a metal framework made with extreme precision under varying torque requirements. An engine mount must therefore be strong and well-built to balance the weight of the engine across a wide range of torque needs.

Another element boosting market revenue growth is the increase in the number of military-grade aircraft. Military-grade aircraft are equipped with aircraft mounts that attach and secure various pieces of gear and weapons, such as missiles, bombs, and cannons. The stresses of weapon launch and release as well as the harsh aspects of flight, such as high speeds, vibrations, and G-forces, are all taken into account while designing aircraft mounts. To assure their dependability and longevity, they are typically manufactured of high-strength materials like steel or titanium and put through rigorous testing.

Some Key Highlights From the Report

In 2022, the military sector accounted for the greatest revenue share. A military aircraft is any fixed-wing or rotary-winged craft employed by a lawful or hostile force of any kind. Military aircraft can be either combat or non-combat oriented. Combat aircraft are built with weapons to destroy enemy property or personnel. Military forces often develop and acquire combat aircraft. They can be produced by either military or civilian organisations, and they are primarily support vehicles.

Over the course of the forecast period, the internal segment is anticipated to account for a sizably high revenue share in the market. These are divided further into bulkhead mounts, floor mounts, headliner mounts, panel mounts, and gallery mounts. The many modules that make up a galley assembly are connected by a monolithic connection block, and they are secured to the floor by a number of floor fittings. Commercial airline galleys frequently include areas for serving and storing food and beverages in addition to space for flight attendant jump seats, emergency equipment storage, and anything else they might need throughout the flight, which is causing this segment's revenue to expand.

In 2022, the division that deals with suspension accounted for a sizeable portion of revenue. An aircraft's landing gear serves as a suspension mechanism for taxiing, taking off, and landing. Its goal is to disperse and absorb the kinetic energy of the landing impact, lessening the impact stresses that are applied to the aircraft. Through the use of a wheel braking system and a wheel steering system, the landing gear also assists in aircraft braking and provides directional control of the aircraft on the ground. The suspension system of the aeroplane includes crucial components called aircraft mounts.

Competitive Outlook:

The global Aircraft Mounts market is highly consolidated due to the presence of a large number of companies across this industry. These companies are known to make hefty investments in research and development projects. Also, they control a considerable portion of the overall market share, thus limiting the entry of new players into the sector. The global Aircraft Mounts

market report studies the prudent tactics undertaken by the leading market players, such as partnerships and collaborations, mergers & acquisitions, new product launches, and joint ventures.

Some major companies in the global market report include Trelleborg AB, GMT Rubber-Metal-Technic Ltd, Cadence Aerospace, ESCO Technologies Inc., Shock Tech, Inc., AirLoc Ltd, PARKER HANNIFIN CORP, National Products Inc., Meeker Aviation, MAYDAY MANUFACTURING.

Additional information offered by the report:

Along with a complete overview of the global Aircraft Mounts market, the report provides detailed scrutiny of the diverse market trends observed on both regional and global levels.

The report elaborates on the global Aircraft Mounts market size and share governed by the major geographies.

It performs a precise market growth forecast analysis, cost analysis, and a study of the micro- and macro-economic indicators.

It further presents a detailed description of the company profiles of the key market contenders.

Market Overview:

The report bifurcates the Aircraft Mounts market on the basis of different product types, applications, end-user industries, and key regions of the world where the market has already established its presence. The report accurately offers insights into the supply-demand ratio and production and consumption volume of each segment.

Emergen Research has segmented the global aircraft mounts market on the basis of aircraft type, mount type, application, end-use, and region:

Aircraft type Outlook (Revenue, USD Million; 2019–2032)

Military

Commercial

General Aviation

Mount Type Outlook (Revenue, USD Million; 2019–2032)

External

Internal

Application Outlook (Revenue, USD Million; 2019–2032)

Suspension

Vibration/ Shock Isolation

Engine Mounts

End-Use Outlook (Revenue, USD Million; 2019–2032)

Replacement

OEM

Regional Outlook (Revenue, USD Million, 2019–2032)

North America

U.S.

Canada

Mexico

Europe

Germany

U.K.

France

Spain

BENELUX

Rest of Europe

Asia Pacific

China

India

Japan

South Korea

Rest of APAC

Latin America

Brazil

Rest of LATAM

Middle East & Africa

Saudi Arabia

UAE

Israel

Rest of MEA

Key Questions Answered in the Report:

What will be the estimated growth rate of the Aircraft Mounts market by 2032?

Who are the prominent distributors, vendors, and manufacturers of the market?

What are the driving and restraining factors of the growth of the Aircraft Mounts market throughout the forecast period?

What are the current and future market trends of the Aircraft Mounts market?

What are the sales and price analysis of the product by types, applications, and regions?

What are the expected opportunities for the companies and new entrants in the coming years?
