Here is the background on this release. Hair loss is not unique to men and women but can vary depending on one's racial background. Thinning hair in an Asian woman may present differently than hair loss in an African-American woman. An expert hair loss surgeon may understand the challenges of various hair types, from coarse strands to thin, smooth strands. The knowledge can help in the success of an individual hair restoration plan. Newly posted hair transplant before and after photos may help a diverse Bay Area population review the limitless possibilities for thicker, fuller hair.
