SAN MATEO LOCALS LEARN BENEFITS OF HYBRID HALO PROCEDURE FROM FOSTER CITY CLINIC

Here is the background on this release. The benefits of Halo may be familiar among Bay Area residents choosing to drive a gas/electric car. Yet, this innovative combination is used in other sectors, including skin care. The "Halo Procedure" is one example. Halo is the first hybrid fractional laser that combines ablative and nonablative wavelengths to treat both the superficial and deep layers of skin to remove the dull, outermost layers. This minimally invasive treatment dramatically boosts skin's collagen and elastin production to smooth fine lines and wrinkles, improving texture and skin discoloration. Fortunately, the Clinic offers a free consultation and Dr. Miguel Canales can then advise on a recommended skin care treatment plan.
