#### Definition:

Mobile health services are a response to reaching populations living in remote, difficult areas and those communities cut-off from mainstream services on account of geography and climatic conditions. Mobile Medical Units (MMUs) represent a significant investment made by the government to enable reaching marginalized populations. The concept of a mobile hospital is not completely new the need for their use, ranging from military field hospitals to the charity or mass disaster tent cities, shows how much they are needed. Although these cases can be reduced to a portable ambulatory unit with a limited scope of outpatient medical activities, an entirely functional hospital is a system with a high degree of complexity far exceeding a regime of compact objects. These are an advanced model of healthcare delivery that could help alleviate health disparities in vulnerable populations and individuals with chronic diseases. The mobile health vehicles provides offering urgent care, providing preventative health screenings, and initiating chronic disease managements.
