

Newvon and NY State Association Partner with The Foundation for Home Health to Launch Caregiver Mentorship Program in MA

NEW YORK, NY, USA, May 31, 2023 /EINPresswire.com/ -- Newvon, a leading provider of e-learning solutions for healthcare, and the New York State Association of Health Care Providers (HCP) have partnered with the Foundation for Home Health (Foundation) to expand the "Legacy of Care Mentorship Program." The program, which was tested and refined in a pilot project in New York State, is now being rolled out to up to 25 home care agencies in Massachusetts with the aim of improving retention rates and job satisfaction in the community-based long-term care workforce.

The Mentorship Program has proven to positively impact job satisfaction and retention rates, and has even become a tool to support recruitment through referrals. Designed to be easily scalable, the program provides everything an agency needs: each of the 25 agencies in Massachusetts will have access to all the tools and resources required to effectively roll out and run a mentorship program for their caregivers.

"We are thrilled to expand the Legacy of Care Mentorship Program in partnership with HCP and the Foundation," said Allan Levine, Senior Vice President of Newvon. "Our goal is to support the community-based long-term care workforce and ensure they receive the training and support they need to thrive in their roles."

The partnership to introduce the Legacy of Care Mentorship Program to Massachusetts is funded by a grant from the Massachusetts HCBS and Human Services Workforce Grant Program.

According to Tim Burgers, Associate Director of the Foundation, "We are excited to partner with Newvon and HCP to bring the Legacy of Care Mentorship Program to our member agencies. This program has the potential to significantly improve job satisfaction for our caregivers and to increase retention rates in our workforce."

Kathy Febraio, President/CEO of HCP, added, "We are proud to be part of this collaboration and see it as a crucial next step in ensuring that the home care workforce has the support they need to continue providing exceptional care."
