

# Relapsed or Refractory Diffuse Large B-cell Lymphoma Market is expected to exhibit a CAGR of 4.2% Says CMI | NovartisAG

SEATTLE, WASHINGTON, INDIA, May 29, 2023 /EINPresswire.com/ -- Diffuse large B-cell lymphoma (DLBCL) is a type of cancer that affects the lymphatic system, which is a part of the body's immune system. When DLBCL does not respond to initial treatment or returns after a period of remission, it is considered relapsed or refractory DLBCL. The Global [Relapsed or Refractory Diffuse Large B-cell Lymphoma Market](#) 2023-2030, published recently by Coherent Market Insights, provides a comprehensive assessment of the market landscape, including both the current and future market situation. The healthcare industry encompasses a wide range of products and services that are designed to promote, maintain, and improve the health and well-being of individuals.

Relapsed or Refractory Diffuse Large B-cell Lymphoma Market

The market for relapsed or refractory DLBCL treatments is a significant area of focus within the pharmaceutical industry. Companies are actively researching and developing novel therapies to address the unmet medical needs of these patients. The goal is to provide more effective and targeted treatment options that can improve outcomes and prolong survival. The market for relapsed or refractory DLBCL treatments is highly competitive, with several pharmaceutical companies actively engaged in clinical trials and seeking regulatory approvals for their therapies. As new treatments emerge, they will undergo rigorous testing to ensure their safety and efficacy, and regulatory agencies will evaluate their benefit-risk profiles before granting approvals.

**“** The relapsed or refractory diffuse large B-cell lymphoma market is estimated to be valued at US\$ 1,364 million in 2022 and is expected to exhibit a CAGR of 4.2% over the forecast period (2023-2030).”
