Increase in prevalence of diseases that require endotherapy devices as well as technological advancements in endotherapy devices drives the market growth. Furthermore, shorter recovery time, minimal postoperative complications, and rise in patient preference for minimally invasive surgeries are projected to supplement the market growth. However, infections caused by few endotherapy, dearth of trained physicians & endoscopists, and high costs associated with endotherapy devices could hamper the market growth. Moreover, unmet medical demands and lucrative opportunities in the emerging and developing countries such as China and India offer profitable opportunities for market expansion.

Endotherapy Devices Market 2030

Among the products, GI devices & accessories segment is the dominant segment contributing towards the growth of global endotherapy devices market in 2017 owing to the increase in incidence of gastrointestinal disorders and diseases requiring the use of GI endotherapy.
