The increasing number of crimes such as cybercrimes and increasing demand for mobile-based law enforcement software will accelerate the need for law enforcement software worldwide. In addition, the rise of mobile analytics and the emergence of data analytics are anticipated to accelerate the growth of the law enforcement software market. However, lack of awareness of the benefits of law enforcement software and increasing privacy concerns are limiting the growth of the law enforcement software market. In addition, many small and medium enterprises entering the market and providing advanced solutions for law enforcement software are anticipated to create more opportunities during the Law Enforcement Software Market Forecastperiod.

Depending on offering, the solution segment holds the largest law enforcement software market

share as it helps to maintain law and order and maintain all records of crimes for further investigation. However, service segment is expected to witness growth at the highest rate during the forecast period as services help avoid the complexities involved in deploying law enforcement software solutions and integrating them with the agencies systems.
