

Tehama Technologies Announces Strategic Partnership with Gerobo International

Gerobo International, a leader in technology innovation, expands their digital security offerings with Tehama Technologies

OTTAWA, ONTARIO, CANADA, June 1, 2023 /EINPresswire.com/ -- Tehama Technologies Inc. and

Gerobo International today announced a strategic partnership to provide Tehama's all-in-one enterprise-level hybrid and remote work platform.

Tehama's integrated solution complements our AI and robotics, making it easier to deploy and manage, cost-effective and secure, while still providing the performance and experience expected from us."

*Gerasimos Gerolymatos, CEO,
Gerobo International.*

The way we work has fundamentally changed. Building, securing, and maintaining a hybrid work infrastructure using traditional approaches requires evaluating multiple vendors, going through procurement cycles for each vendor, integrating selected technologies and defining and creating effective management, governance, audit, and risk strategies. All of this is highly complex, expensive, and hard to maintain, let alone scale. The future of the enterprise desktop is in the cloud, which has profound implications for the future of work itself.

In response, organizations around the world are now realizing they need to invest strategically in remote and hybrid workforce capabilities; legacy products and traditional approaches are no longer sustainable. Tehama's all-in-one platform leverages its [P5 architecture](#), which includes fortified cybersecurity, simplified risk management, policy-based automation at scale to deliver ultra-secure remote access and the fastest time to value in the market today.

"Tehama addresses multiple business, operational and security concerns while simplifying and accelerating the way hybrid work is enabled and supported," said Mick Miralis, Chief Revenue Officer, Tehama. "For Gerobo, Tehama's platform and P5 architecture is a game-changer that will enable our customers to accelerate their [digital transformation](#), dramatically improving the security posture and accessibility for everything from the cloud to their desktops, while complementing further the AI-driven and robotics solutions they are deploying."

"Tehama's fully integrated solutions complement our AI and robotics solutions, making them

easier to deploy and manage, more cost-effective and more secure, while at the same time providing the performance and experience our customers have come to expect from us," said Gerasimos Gerolymatos, CEO, Gerobo International. "We are excited to be working with an organization that truly understands the challenges our customers face in their digital journey and the ever-present security challenges. With Tehama, we are able to stay ahead of the innovation curve, revolutionize the way work is delivered and provide value from day one."

About Tehama Technologies

Tehama Technologies provides the leading all-in-one enterprise-level hybrid and remote work platform for the secure access to data and applications. Leveraging its Power of

Five (P5) architecture, Tehama enables end-to-end integration, fulfills risk management and policy-based requirements, ensures cost-effective and ultra-secure remote access, while accelerating time to value with fast onboarding and automation at scale.

Tehama is focused on enabling hybrid and remote work by providing organizations including public sector, financial services, healthcare and telecommunications, to name but a few, with the ability to securely access data and applications with a second to none user experience and the fastest ROI in the market.
